*Together
we make
a difference*

Word by Mr. President of Benha University

Benha University interested in continuous progress to complete all activities forms of scientific research quality aiming to qualify innovator researcher to raise scientific, cultural and social construction for Egyptians; drive the research plan to serve the community and environment and contribute in pushing development corridor.

The University is also working to establish centers of excellence providing advanced scientific and research services to the local and regional community with focusing on qualify specialized staff, work to support the fields that the University are characterized and meet the needs of labor market.

From this point I seek to spare no effort in order to implement the strategic plan of Benha University (2011 -2015) as soon as possible.

The completion of the research plan comes from the early efforts of the University to implement its strategic plan within the framework of scientific research quality.

No doubt, activity, has been reached by Sector of Post Graduate Studies and Researches, is a result of efforts by the Sector head and the work team of formulating the research plan of the University and its faculties. It gives me much pleasure to present such plan as a framework to the University and its faculties within the next five years.

I thank everyone who participates in realizing such plan wishing to the University, its staff, and student of Post Graduate Studies and Researches every progress and success in performance the work system within the Sector.

**The President of the University
Prof. Mohamad Safwat Zahran**

Word by vice-president for Post Graduate Studies and Researches

The scientific research is the real engine of economic progress and the main element for the development and raising standard of the people particularly at the shadow of the economy based on knowledge and competitive.

Efforts have gathered to make the scientific research message in Egypt includes: scientific and technology knowledge; achieving excellence, competition and international participation; stimulating of innovation; and developing self-abilities throughout the activation of national strategy of scientific research as well as development and restructure such research to contribute in modernizing and development service and productive sectors . From this point the Research Plan of Benha University (2011-2015) has been activated.

The main goal of such Plan includes; supporting the efforts of economic and social development, solving national problems to realize the scientific research quality which represents the third dimension of the strategic plan of the University and keeping up with the national strategy of scientific research with its variety fields which represents in the new and renewable energy; resources, management and desalination of water; medical science of kidney disease, liver and tumors; science of biotechnology and Nanotechnology; science of Agriculture and food resources; and technology of information, communication and remote sensing.

Such plan also contributes in creation of new knowledge to develop the scientific research and put Benha University at the international stage as a center of research excellence.
