Results

Fig. (11): Two periungual warts in the 1st visit before 5-FU and bleomycin injections.

Fig. (12): The same patient in the 3rd visit (after 2 injections) showing complete response of both 5-FU and bleomycin injected warts.
Fig. (13): Two periungual warts in the 1st visit before 5-FU and bleomycin injections.

Fig. (14): The same patient in the 4th visit (after 3 injections) showing complete response in both bleomycin and 5-FU injected wart.
Results

Fig. (15): Two plantar warts in the 1st visit before 5-FU and bleomycin injections.

Fig. (16): The same patient in the 3rd visit (after 2 injections) showing complete response in both bleomycin and 5-FU injected warts.
Fig. (17): Two plantar warts in the 1st visit before 5-FU and bleomycin injections.

Fig. (18): The same patient in the 4th visit (after 3 injections) showing complete response in both bleomycin and 5-FU injected warts.
Fig. (19): Two plantar warts in the 1st visit before 5-FU and bleomycin injections.

Fig. (20): The same patient showing blackening of the two warts in the 2nd visit (after 1 injection).

Fig. (21): The same patient after removal of the black tissue showing complete response.
Results

Fig. (22): Two plantar warts in the 1st visit.

Fig. (23): The same patient in the 2nd visit (after 1 injection) showing complete response of the 5-FU injected wart and partial response of the bleomycin injected wart.

Fig. (24): The same patient in the 3rd visit (after 2 injections) showing complete response in both bleomycin and 5-FU injected warts.
Fig. (25): Two periungual warts in the 1st visit.

Fig. (26): The same patient in the 2nd visit (after 1 injection) showing bullae in the bleomycin injected wart and complete response of the 5-FU injected wart.
Fig. (27): Two periungual warts in the 1st visit.

Fig. (28): The same patient in the 3rd visit (after 2 injections) showing blackening of the nail after 5-FU injection.
Fig. (29): Two periungual warts in the 1st visit.

Fig. (30): The same patient in the 5th visit (after 4 injections) showing partial response in both bleomycin and 5-FU injected wart.
Fig. (31): Two plantar warts before 5-FU and bleomycin injections.

Fig. (32): The same patient in the 4th visit (after 3 injections) showing complete response of the 5-FU injected wart and partial response.
