4-3 Jim is so well off! He ought tohelp his parents a little.

4-4 He can come in the car with me if he is in a hurry.

5-Translate the following passage:

In 1839, Kirkpatrick Macmillan, a Scottish blacksmith, invented a much better bicycle. Macmillan's machine had tires with iron rims to keep them from getting worn down. He also used cranks similar to pedals, so his bicycle could be ridden at a quick pace. Although Macmillan's bicycles could be ridden easily, they were never produced in large numbers.

في عام ١٨٣٩ اخترع الحداد الاسكتلندي كيركباتريك ماكميلان دراجة أفضل من سابقتها. هذه كانت تحتوي علي اطارات حوافها حديدية كي لا تتآكل مع الاستخدام، كما استخدم سواعد شبيهة بالبدالات لذلك كانت دراجته اسرع في الحركة. وبالرغم من سهولة حركتها لقائدها إلا انها لم تنتج بإعداد كبيرة.
