
CONTENTS

• INTRODUCTION.....	1
• AIM OF THE WORK	3
• REVIEW OF LITERATUER	
○ ISCHEMIC HEART DISEASE :	
▪ Pathphysiology	4
▪ Atherosclerosis and coronary artery disease	5
▪ Atherosclerotic pathways	8
▪ Stable angina pectoris	13
▪ Asymptomatic (silent ischemia).....	14
▪ Unstable angina and non ST- elevetion MI	15
▪ Pathphysiology and clinical presentation of unstable angina	16
▪ Pathology and diagnosis of AMI	20
▪ The pathogenesis of AMI.....	22
▪ Treatment of acute MI.....	29
○ RISK FACTORES OF CORONARY ATHEROSCLEROSIS:	
• Modifiable risk factors	37
▪ Risk factors for which interventions have proved to lower risk of coronary heart disease	37

▪ Risk factors for which interventions are likely to lower risk of coronary heart diseases	41
▪ Risk factors for which interventions might lower risk of coronary heart diseases	44
• Non modifiable risk factors.....	47
○ THYROID FUNCTION TESTS :	
▪ Direct tests of thyroid function	51
▪ Tests related to concentration and binding of thyroid hormones in blood	54
▪ Tests that assess mechanisms for regulation of thyroid hormones	59
▪ Miscellaneous tests	61
▪ Tests that assess metabolic impact thyroid hormones.....	64
○ CARDIOVASCULAR MANIFESTATIONS OF THYROID DISEASES :	
▪ Effect of hyperthyroidism on cardiovascular system.....	65
▪ Effect of hypothyroidism on cardiovascular system.....	72
○ EU-THYROID SICK SYNDROME :	
▪ Definition	75
▪ Non thyroid illness syndrome	77
▪ Pathogenesis of the NTIS	80
▪ Clinical significance of NTIS	82
• SUBJECTS AND METHODS	83
• STATISTICS	87
• RESULTS	90
• DISCUSSION.....	101
• SUMMARY AND CONCLUSION	109
• RECOMMENDATION	115
• REFERENCES.....	116
• ARABIC SUMMARY.
