CHAPTER (1)

INTRODUCTION.

I-	Scintillations.....	2
II-	Luminescent materials.....	2
III-	Scintillation counters.....	4
IV-	Uses of scintillation counter.....	7
V-	The principal advantages of scintillation counters.....	8
VI-	Types of scintillation counters.....	10
	(a) Solid scintillation counters.....	10
	i- Inorganic crystals scintillation counters.....	10
	ii- Organic crystals.....	14
	(b) Liquids and plastics.....	16
	i- Liquid scintillation counters.....	16
	ii- Plastic scintillators.....	23
	(c) Gas scintillator counters.....	26

CHAPTER (2)

THEORY

INTRODUCTION.

I-	Luminescence processes in inorganic crystals.....	29
	i- Conditions for luminescence emission.....	29
	ii- Energy transfer in crystal phosphors.....	32
	iii- Rise and decay of luminescence.....	34

(b)

	Page
II- Luminescence processes in organic molecules.....	37
i- Conditions for luminescence in organic molecules.....	37
ii- The decay of luminescence.....	39
iii- Energy transfer processes in organic crystals and liquids.....	39
III- The response of organic materials to different exciting particles or radiation.....	45
IV- Deterioration processes in organic systems.....	47

CHAPTER (3)

APPARATUS

I- General description.....	49
II- Working conditions.....	50
III- The photomultiplier tube.....	52
IV- Sample preparation.....	56

CHAPTER (4)

PART (I)

I- Chloroform quenching of Anthracene-Toluene solutions.....	58
II- Concentration dependence of quenching and energy transfer.....	59
III- Values of the quenching and quenching constant....	64
IV- Chloroform of quenching Naphthol-Toluene solutions.	68
V- Values of quenching and quenching constant.....	73
VI- Effect of chloroform on Anthracene-Xylene system..	76

(c)

VII-	Values of the quenching and quenching constant....	82
VIII-	Comparison between the quenching effect of chloroform in Anthracene + Toluene system and Naphthol + Toluene system.....	85
IX-	Comparison between the quenching effect of chloroform in Anthracene + Toluene system and Anthracene + Xylene system.....	88
	DISCUSSION.....	90

PART (II)

ENHANCEMENT OF LIGHT EMISSION BY THE ADDITION OF SECOND SOLVENTS.

INTRODUCTION.

i-	Effect of adding POPOP to solutions of toluene and naphthol adding to n-butylphosphate.....	93
ii-	Effect of adding chloroform as a quencher to toluene + anthracene + POPOP system.....	97
	CONCLUSION.....	101

CHAPTER (5)

GENERAL CONCLUSION.....	102
REFERENCES.....	106
