	SUMMARY	i
1.	INTRODUCTION	1
2.	APPLICATIONS OF POLYELECTROLYTES IN WATER AND WASTEWATER TREATMENT	4
2.1	Application of Polyelectrolytes in Potable Water Supply	5
2.1.1.	Removal of organic matter	5
2.1.2.	Removal of colour and turbidity	6
2.1.3.	Microbiological removal	7
2.1.4.	Polyelectrolytes in water softening and desalination.	8
2.1.5.	Polyelectrolytes in direct filtration	8
2.1.6.	Use of polyelectrolytes for the removal of suspended solids	9
2.1.7.	Use of polyelectrolytes in the removal of trihalomethane precursors	10
2.1.8.	Use of polyelectrolytes for the improvement of mass transfer zone of ozone used for disinfection	10
2.1.9.	Use of polyelectrolytes in managing water treatment sludge	10
2.2.	Applications of Polyelectrolytes in Industrial Water Supply	11
2.3.	Applications of Polyelectrolytes in Industrial Effluent Treat- ment	11
2.3.1.	Use of polyelectrolytes in trace metal removal	12
2.3.2.	Use of polyelectrolytes in effluent treatment by diasolved air flotation	12
2.3.3.	Use of polyelectrolytes in radioactive effluents treatment	13
2.3.4.	Use of polyelectrolytes in treating oil-contaminated industrial wastewater	13

	Page
2.3.5. Use of polyelectrolytes in conditioning anaerobically digested sludge	13
2.3.6. Use of polyelectrolytes in treatment of tannery effluents	14
2.3.7. Use of polyelectrolytes for overloaded clarifiers	14
2.3.8. Use of polyelectrolytes in removal of suspended solids from lime-sulfide unhairing effluents	14
2.3.9. Use of polyelectrolytes in detoxification and decolorization of kraft pulp mill effluents	14
2.3.10 Use of polyelectrolytes in treatment ore enrichment plant wastewater containing sprucewood tannins	15
2.4. Application of Polyelectrolytes in Municipal Sewage Treatment	15
2.5. Application of Polyelectrolytes as Scale Inhibitors	15
(3) EXPERIMENTAL	17
3.1. Synthesis of Polyalkylarylamines	17
3.1.1 Adducts of Polyalkylarylamines with Sn Cl_2 (I - IV)	17
3.1.2. Polyalkylarylamine hydrochlorides (V - VIII)	17
3.1.3. Free polyalkylarylamine (IX - XII)	18
3.1.4. Analysis of Adducts	18
3.2. Application of polyalkylarylamine hydrochlorides as polyelectrolytes in watertreatment	19
(4) RESULTS AND DISCUSSION	12
4.1. Identification of Adducts	12
4.2. Application of Adducts (V),(VII)and(VIII) As a Coagulant Aid in Water Treatments	23
(5) CONCLUSIONS	26
(6) TABLE	28
(7) FIGURES	37
