ACKNOWLEDGEMENT	
ABSTRACT	
INTRODUCTION	1
1 : General Outline.....	1
2 : Location of the study area.....	3
3 : Climatic conditions.....	3
4 : Previous works.....	7
5 : Scope to the present study.....	8
6 : Technique and methods of study.....	8
6.1 : Hydrogeological studies include.....	8
6.2 : Hydrochemical studies include.....	9
6.3 : Water pollution studies include.....	10
7 : Land use.....	10
 CHAPTER (I)	
GEOLOGY OF THE STUDY AREA	13
1.1 : General Outline.....	13
1.2 : Topography and Geomorphology.....	13
1.2.1 : Alluvial Plains.....	16
1.2.1.1 : Young Alluvial Plains.....	16
1.2.1.2 : Old Alluvial Plains.....	16
1.2.2 : Structural Plain.....	17
1.2.2.1 : Folded ridges.....	17
1.2.2.2 : The Erosional Valleys.....	18
1.2.3 : The Southern Tableland.....	18
1.2.4 : The Shifting Sand.....	20
1.3 : Stratigraphy.....	20
1.3.1 : Upper Cretaceous (Cenomanian to Senonian).....	20
1.3.2 : Tertiary deposits.....	25
1.3.3 : Quaternary deposits.....	30
1.4 : Structures.....	32
1.5 : Geologic History.....	37
 CHAPTER (II)	
HYDROGEOLOGY OF THE STUDY AREA	39
2.1 : General Outlines.....	39
2.2 : Surface water system.....	40
2.2.1 : The Nile River and Rosetta Branch.....	40
2.2.2 : The irrigation system (canals and drains).....	44

	Page
2.3 : Groundwater system.....	46
2.3.1 : The Quaternary (Pleistocene) aquifer (Nile Delta aquifer)..	46
2.3.1.1 : Hydraulic parameters of the Quaternary (Pleistocene) aquifer.....	55
2.3.2 : Lower Miocene aquifer (Moghra aquifer).....	57
2.3.2.1 : Hydrogeological problems at Tabark area.....	59
(a) : Problems of supply wells at Tabark area.....	63
(b) : Hydraulic parameters of the Lower Miocene aquifer at Tabark area.....	66
(i) : Transmissivity (T).....	66
(ii) : Hydraulic Conductivity (K).....	67
2.3.3 : The Oligo-Miocene aquifer.....	67
2.3.3.1 : Hydrogeological problems at Green Belt around Six of October City	69
(a) : Problems of supply wells at Green Belt around Six of October City.....	72
(b) : Hydraulic parameters of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	74
(i) : Transmissivity (T).....	74
(ii) : Hydraulic Conductivity (K).....	74

CHAPTER (III)

HYDROCHEMICAL ASPECTS OF SURFACE WATER AND GROUNDWATER IN THE STUDY AREA

3.1 : General Outlines.....	76
3.2 : Hydrogeochemistry of surface water in the study area.....	77
3.2.1 : Hydrochemical composition of surface water of the main canals.....	77
3.2.2 : Hydrochemical composition of surface water of the main drains.....	78
3.2.3 : Hydrochemical composition of surface water of the sewage station.....	80
3.3 : Hydrogeochemistry of groundwater in the study area.....	80
3.3.1 : Hydrogeochemistry of Quaternary (Pleistocene) aquifer...	81
3.3.1.1 : Total salinity distribution in the groundwater of the Quaternary (Pleistocene) aquifer.....	81
3.3.1.2 : Distribution of potassium in the groundwater of the Quaternary (Pleistocene) aquifer.....	85
3.3.1.3 : Distribution of sodium in the groundwater of the Quaternary (Pleistocene) aquifer.....	88
3.3.1.4 : Distribution of magnesium in the groundwater of the Quaternary (Pleistocene) aquifer.....	90

	Page
3.3.1.5 : Distribution of calcium in the groundwater of the Quaternary (Pleistocene) aquifer.....	93
3.3.1.6 : Distribution of chloride in the groundwater of the Quaternary (Pleistocene) aquifer.....	97
3.3.1.7 : Distribution of sulphate in the groundwater of the Quaternary (Pleistocene) aquifer.....	102
3.3.1.8 : Distribution of bicarbonate in the groundwater of the Quaternary (Pleistocene) aquifer.....	102
3.3.1.9 : Hydrochemical Coefficients of the Quaternary (Pleistocene) aquifer.....	105
3.3.1.10 : Hypothetical salt assemblages of the Quaternary (Pleistocene) aquifer.....	111
3.3.2 : Hydrogeochemistry of the Lower Miocene aquifer at Tabark area.....	112
3.3.2.1 : Total salinity distribution in the groundwater of the Lower Miocene aquifer at Tabark area.....	112
3.3.2.2 : Distribution of potassium in the groundwater of the Lower Miocene aquifer at Tabark area.....	115
3.3.2.3 : Distribution of sodium in the groundwater of the Lower Miocene aquifer at Tabark area.....	115
3.3.2.4 : Distribution of magnesium in the groundwater of the Lower Miocene aquifer at Tabark area.....	117
3.3.2.5 : Distribution of calcium in the groundwater of the Lower Miocene aquifer at Tabark area.....	120
3.3.2.6 : Distribution of chloride in the groundwater of the Lower Miocene aquifer at Tabark area.....	122
3.3.2.7 : Distribution of sulphate in the groundwater of the Lower Miocene aquifer at Tabark area.....	122
3.3.2.8 : Distribution of bicarbonate in the groundwater of the Lower Miocene aquifer at Tabark area.....	124
3.3.2.9 : Hydrochemical Coefficients of the Lower Miocene aquifer at Tabark area.....	127
3.3.2.10 : Hypothetical salt assemblages of the Lower Miocene aquifer at Tabark area.....	130
3.3.2.11 : Semi-logarithmic representation of groundwater samples of the Lower Miocene aquifer at Tabark area.....	131
3.3.3 : Hydrogeochemistry of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	131
3.3.3.1 : Total salinity distribution in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	131

	Page
3.3.3.2 : Distribution of potassium in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	135
3.3.3.3 : Distribution of sodium in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	135
3.3.3.4 : Distribution of magnesium in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	135
3.3.3.5 : Distribution of calcium in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	137
3.3.3.6 : Distribution of chloride in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	137
3.3.3.7 : Distribution of sulphate in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	139
3.3.3.8 : Distribution of bicarbonate in the groundwater of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	139
3.3.3.9 : Hydrochemical Coefficients of the Oligo- Miocene aquifer at Green Belt around Six of October City.....	139
3.3.3.10 : Hypothetical salt assemblages of the Oligo-Miocene aquifer at Green Belt around Six of October City.....	143
3.3.3.11 : Semi-logarithmic representation of groundwater samples of the Oligo- Miocene aquifer at Green Belt around Six of October City.....	143

CHAPTER (IV)

GROUNDWATER POLLUTION OF THE QUATERNARY (PLEISTOCENE) AQUIFER

4.1 : General Outline.....	145
4.2 : Sources of Pollution.....	145
4.2.1 : Natural sources of pollution.....	145
4.2.2 : Sources due to human activities.....	145
4.2.2.1 : Groundwater pollution from Domestic activities.....	146
4.2.2.2 : Groundwater pollution from Agricultural activities.....	150
4.2.2.3 : Groundwater pollution from industrial activities.....	150
4.3 : Pollution in groundwater of the Quaternary (Pleistocene) aquifer with major elements.....	151

	Page
4.4 : Pollution in groundwater of Quaternary (Pleistocene) aquifer with trace elements.....	151
4.4.1 : Iron content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	153
4.4.2 : Manganese content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	154
4.4.3 : Zinc content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	159
4.4.4 : Copper content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	164
4.4.5 : Lead content distribution in the groundwater of the Quaternary (Pleistocene) aquifer.....	166
4.5 : Groundwater pollution of Quaternary (Pleistocene) aquifer with nutrient.....	171
4.5.1 : Nitrate (NO_3^-) content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	171
4.5.2 : Ammonium content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	173
4.5.3 : Phosphate content distribution in the groundwater of Quaternary (Pleistocene) aquifer.....	176
4.6 : Groundwater pollution of Quaternary (Pleistocene) aquifer with microbiological organisms.....	181

CHAPTER (V)

EVALUATION OF GROUNDWATER FOR DIFFERENT PURPOSES

5.1 : General Outline.....	188
5.2 : Evaluation of groundwater for domestic and agricultural purposes according to salinity content.....	189
5.3 : Evaluation of groundwater for domestic and agricultural purposes according to chloride content.....	192
5.4 : Evaluation of groundwater for domestic and agricultural purposes according to bicarbonate content.....	193
5.5 : Evaluation of groundwater for domestic and agricultural purposes according to sulphate content.....	195
5.6 : Evaluation of groundwater for domestic and agricultural purposes according to sodium content.....	198
5.7 : Evaluation of groundwater for domestic and agricultural purposes according to magnesium content.....	204
5.8 : Evaluation of groundwater for domestic and agricultural purposes according to calcium content.....	205

	Page
5.9 : Evaluation of groundwater for domestic and agricultural uses according to trace elements content.....	207
5.9.1 : Evaluation of groundwater for domestic and agricultural uses according to iron content.....	207
5.9.2 : Evaluation of groundwater for domestic and agricultural uses according to manganese content.....	208
5.9.3 : Evaluation of groundwater for domestic and agricultural uses according to copper content.....	209
5.9.4 : Evaluation of groundwater for domestic and agricultural uses according to zinc content.....	210
5.9.5 : Evaluation of groundwater for domestic and agricultural uses according to lead content.....	210
5.10 : Evaluation of groundwater for domestic and agricultural uses according to nutrient content.....	211
5.10.1 : Evaluation of groundwater for domestic and agricultural uses according to nitrate content.....	211
5.10.2 : Evaluation of groundwater for domestic and agricultural uses according to ammonium content.....	213
5.10.3 : Evaluation of groundwater for domestic and agricultural uses according to phosphate content.....	213
