| <b>ACKNOWLEDGMENTS .....</b>                 | <b>i</b>  |
| <b>CHAPTER (I): INTRODUCTION</b>             |           |
| 1- General statement .....                   | 1         |
| 2- Aim of study .....                        | 2         |
| 3- Materials and methods .....               | 3         |
| 4- Previous work .....                       | 3         |
| <b>CHAPTER (II): STRATIGRAPHY</b>            |           |
| 1- Introduction .....                        | 17        |
| 2- Oligocene sections .....                  | 19        |
| 3- Miocene sections .....                    | 20        |
| 4- The Pliocene .....                        | 21        |
| 4.1. Paleogeographic consideration .....     | 21        |
| 4.2. Pliocene formations .....               | 24        |
| <b>4.2.1. Kafr El Shiekh Formation .....</b> | <b>25</b> |
| 1- West of Beni Youssif section .....        | 27        |
| 2- West of Dahshour section .....            | 27        |
| 3- Monshaat Kaseb section .....              | 28        |
| 4- Kafr Hemyied section .....                | 28        |
| 5- Tahma section .....                       | 29        |
| 6- Fossils and age assignment .....          | 30        |
| <b>4.2.2. Kom El Shelul Formation .....</b>  | <b>31</b> |
| 1- Kom El Shelul section .....               | 31        |
| 2- Southwest of Kafr El Gebel section .....  | 32        |
| 3- Cairo Ring Road section .....             | 33        |
| 4- West of Beni Yousif Section.....          | 34        |

|                                                |           |
|------------------------------------------------|-----------|
| 5- Southwest of Beni Youssif section .....     | 35        |
| 6- West Kafr Hemyied section .....             | 36        |
| 7- West Abu Rowish section.....                | 36        |
| 8- West Tahma section .....                    | 37        |
| 9- Fossils and age assignmet .....             | 38        |
| <b>4.2.3. The wastani Formation .....</b>      | <b>38</b> |
| 1- Kafr Dawoud section .....                   | 39        |
| 2- West Kafr Dawoud section .....              | 40        |
| 3- 120 km Cairo-Alex Desert road section ..... | 41        |
| 4- North El Khatatba section .....             | 42        |
| 5- El Khatatba section .....                   | 42        |
| 6- Southwest of Sign Qata section .....        | 43        |
| 7- West Abu Sir section .....                  | 43        |
| 8- West of Dahshour section .....              | 44        |
| 9- West of Tahma section .....                 | 45        |
| 10- West of sedmant El Gebel section .....     | 45        |
| 11- Khorshed section .....                     | 46        |
| 12- Age assignment .....                       | 47        |
| <b>5- Quatreanary sediments .....</b>          | <b>47</b> |
| 1- Gypsum deposits .....                       | 48        |
| 2- Higher gravel terrace .....                 | 49        |
| 3- Middle gravel terrace .....                 | 50        |
| 4- Lower gravel terrace .....                  | 50        |
| 5- Clay and silt unit .....                    | 51        |
| 6- Sand deposits .....                         | 54        |
| 7- Sand dunes .....                            | 55        |

## **CHAPTER (III): FACIES AND DEPOSITIONAL ENVIRONMENTS**

|                                              |           |
|----------------------------------------------|-----------|
| <b>1- Introduction .....</b>                 | <b>56</b> |
| <b>2- Kafr El Shiekh Formation .....</b>     | <b>56</b> |
| - Fossiliferous black clay lithofacies ..... | 56        |
| - Depositional environment.....              | 57        |
| <b>3- Kom El Shelul Formation .....</b>      | <b>58</b> |
| 1) Coquina limestone lithofacies .....       | 58        |
| 2) Dolostone lithofacies .....               | 61        |
| 3) Sandstone lithofacies .....               | 62        |

## **CHAPTER (IV): HEAVY MINERAL ANALYSIS**

|                                           |    |
|-------------------------------------------|----|
| 1- Introduction .....                     | 65 |
| 2- Mineralogy of the light minerals ..... | 66 |
| 3- Mineralogy of heavy fraction .....     | 66 |
| 3.1 Opaque minerals .....                 | 67 |
| 3.2 Non-opaque minerals .....             | 67 |
| 4- Discussion .....                       | 74 |
| 4.1 Evidence from light minerals .....    | 74 |
| 4.2 Evidence from heavy minerals .....    | 74 |

## **CHAPTER (V): GEOLOGICAL HISTORY AND CONCLUSIONS .....**

|                         |           |
