

# Contents

## ***Chapter 1***

### ***Introduction***

1.1 Types of corrosion	2
1.2 Corrosion prevention by electrochemical methods	5
1.3 Types of adsorption	9
1.4 Electrochemical nature of steel corrosion	12
1.5 Literature survey of corrosion of carbon steel in aqueous media	15
Aim and scope of the present work	36

## ***Chapter 2***

### ***Experimental***

2.1 Chemical composition of carbon- steel electrode	38
2.2 Chemical additives and solutions	38
2.3 Experimental techniques	40
2.4 Procedures used for corrosion measurements	47
2.5 Conductometric titration	48
2.6 Potentiometric titration	48

## ***Chapter 3***

### ***Results and discussion***

#### ***Section (A)***

#### **Effect of Investigated Azo dyes on The Corrosion Behavior of Carbon Steel in 2M HCl Solution by The Mass loss Technique**

3.1 Corrosion- inhibitors behaviour	50
3.2 Effect of temperature on corrosion process	58
3.3 Adsorption isotherm	87
3.4 Thermodynamic parameters	94
<b>Section (B)</b>	104

#### **Kinetics of The Corrosion Inhibition of Carbon Steel in Hydrochloric Acid Solutions Using Galvanostatic Polarization Technique**

3.5 Galvanostatic polarization	105
3.6 Adsorption isotherm	108

#### **Section (C)**

#### **Initiation and Inhibition of Pitting Corrosion of Carbon Steel in Na<sub>2</sub>CO<sub>3</sub> Solutions**

3.7 Initiation and inhibition of pitting corrosion of carbon steel in Na <sub>2</sub> CO <sub>3</sub> solution	121
i) Initiation of pitting corrosion of carbon steel	122
ii) Effect of some azodye compounds on the pitting	125

corrosion of carbon steel under potentiodynamic anodic polarization

#### ***Chapter 4***

##### ***Conductometric Titration***

4.1 Conductometric titration	135
------------------------------	-----

#### ***Chapter 5***

##### ***Potentiometric Studies***

5.1 Potentiometric alkalimetric titration of solution of inhibitors and their $\text{Fe}^{2+}$ with KOH solution	144
5.2 Potentiometric titration of azo compounds with $\text{Fe}^{2+}$ ion	147
5.3 Metal-ligand stability constants	149

#### ***Chapter 6***

6- Mechanism of inhibition	162
<b>English summary</b>	166
<b>References</b>	169
