Aim of the work

English Summary.....	i
Introduction.....	1
1-Polymeric Quaternary Ammonium Materials.....	2
1-2- the comparison between the phosphonium salts and the commonly available quaternary ammonium salts.....	14
1-3- Antibacterial activities of quaternary ammonium salt of chitosan.....	22
2-polymeric quaternary phosphonium materials.....	29
3- <i>N</i> -halamine biocidal polymers.....	34
4-Other polymeric biocidal materials.....	42
 Experimental.....	 57
Raw materials used	57
Preparation of polymeric quaternary ammonium chloride salts (1-7)	58
Preparation of polymeric quaternary ammonium acetate salts (8-14)	58
Preparation of polymeric quaternary ammonium bromide salt of HMTA with 1,2-dibromoethane (15)	59
Antibacterial potentialities of the synthesized polymers against the tested organisms	60

Result and Discussion	62
Preparation of polymeric ammonium salts of HMTA	
with CH ₂ Cl ₂ (1 and 8)	62
Preparation of polymeric quaternary ammonium salts of HMTA	
with CHCl ₃ (2 and 9)	68
Preparation of polymeric quaternary ammonium salts of HMTA	
with CCl ₄ (3 and 10)	71
Preparation of polymeric quaternary ammonium salts of HMTA	
with ClCH ₂ CH ₂ Cl (4 and 11)	74
Preparation of polymeric quaternary ammonium salts of HMTA	
with Cl ₂ CHCHCl ₂ (5 and 12)	78
Preparation of polymeric quaternary ammonium salts of HMTA	
with trichloroacetic acid (6 and 13)	83
Preparation of polymeric quaternary ammonium salts of HMTA	
with chloral hydrate (7 and 14)	86
Preparation of polymeric quaternary ammonium salts of HMTA	
and 1,2-dibromoethane (15)	90
Studying the biological activity of the resultant polymers	93
References	103
Arabic Summary
