<u>Chapter(1):Introduction</u>	Page
1.1 Acknowledge of the studied drugs.....	1
1.1.1. Norfloxacin.....	1
1.1.2. Ciprofloxacin.....	5
1.1.3. Ofloxacin.....	10
1.2. Literature survey for the determination of drugs.....	15
1.2.1 Literature survey for the determination of Norfloxacin	15
1.2.1.1 Spectrophotometric methods.....	15
1.2.1.2 High performance liquid chromatography (HPLC) methods.....	24
1.2.1.3 Capillary electrophoresis methods.....	25
1.2.1.4 Flourimetric methods.....	26
1.2.2. Literature survey for the determination of ciprofloxacin.....	29
1.2.2.1 Spectrophotometric methods.....	29
1.2.2.2 High performance liquid chromatography (HPLC) methods.....	39
1.2.2.3 Flourimetric methods.....	40
1.2.3. Literature survey for the determination of Ofloxacin	41
1.2.3.1 Spectrophotometric methods.....	41
1.2.3.2 Oscillopolarographic titration methods.....	44

1.3. Reagents.....	46
1.3.1 Eriochromeblack T	46
1.3.2 Calconcarboxylic acid	50
1.3.3 Alizarin red S	53
Aim of the present work.....	57

Chapter(2):Experimental

2.1. Apparatus.....	59
2.2. Drugs.....	59
2.2.1 Norfloxacin.....	59
2.2.1 A. pure sample	59
A.1.(EIPICO) Company method	60
2.2.2 Ciprofloxacin	61
2.2.2 A. pure sample.....	61
A.1.(EIPICO) Company method	62
2.2.3 Ofloxacin.....	62
2.2.3 A. pure sample.....	62
A.1.SEDICO Company method.....	62
2.3. Reagents , Solvents and buffer solution.....	63
2.4. Market samples.....	64
2.5. Determination of the composition.....	65
2.5. A. The molar ratio method.....	65
2.5. B. The continuous variation method.....	65
2.6. Spectrophotometric determination of the drugs under investigation using ion - pair complex formed with acid dyes	66
2.6.1 Procedure for determination of the studied drugs in authentic powder using Calconcarboxylic acid...	66

2.6.2	Procedure for determination of the studied drugs in authentic powder using Eriochromeblack T.....	67
2.6.3	Procedure for determination of the studied drugs in authentic powder using Alizarin red S.....	67
2.7.	Dosage forms.....	69
2.7.1	Procedure for the determination of norfloxacin in Epinor (EIPICO)and Noracin(Memphis)tablets.....	69
2.7.1.A	(EIPICO) Procedure for the determination of norfloxacin in tablets by HPLC.....	69
2.7.2	Procedure for determination of Ciprofloxacin in Ciprocin (EIPICO), Ciprobay (Alkan pharma) and Ciprofloxacin (Amriya) tablets.....	71
2.7.2.A	(EIPICO) method for the determination of Ciprofloxacin in tablets.....	71
2.7.3	Procedure for the determination of Ciprofloxacin in (Ciprofloxacin) eye drops (500 mg) of (EIPICO).....	73
2.7.3.A	(EIPICO) Procedure for the determination of Ciprofloxacin in eye drops by HPLC.....	73
2.7.4	. Procedure for the determination of Ciprofloxacin in (Ciprofloxacin) injection vial of (EIPICO).....	75
2.7.4.A	(EIPICO) Procedure for the determination of Ciprofloxacin in injection vial by HPLC..	75
2.7.5	Procedure for the determination of Ofloxacin in tablets of Ofloxacin of (Sedico), Ofloxin of (Kahira) and Oflocin of (Memphis).....	76
2.7.5.A	(Sedico) Procedure for the determination of Ofloxacin in tablets.....	77

2.7.6	Procedure for the determination of Ofloxacin in eye drop of Ofloxin eye drops , produced by Kahira.....	78
2.7.6.A	Kahira Procedure for the determination of Ofloxacin in eye drop.....	78

Chapter (3): Results and discussion

3.1.	Determination of the studied drugs by complex formation with acid dye.....	80
3.1.1	Absorption spectra of the studied drugs with Calconcarboxylic acid.....	80
3.1.1.1	Effect of pH.....	80
3.1.1.2	Effect of shaking time.....	83
3.1.1.3	Effect of the polarity of extracting solvents.....	84
3.1.1.4	Effect of reagent concentration.....	84
3.1.1.5	Molar ratio of the complexes.....	85
3.1.1.6	Interference.....	87
3.1.1.7	Evaluation of the stability constant of the ion- pair complexes.....	87
3.1.1.8	Statistical analysis.....	88
3.1.1.9	Validity to Beer's law.....	90
3.1.1.10	Accuracy and precision.....	93
3.1.1.11	Determination of the studied drugs in urine samples by using Calconcarboxylic acid	94
3.1.1.12	Analytical application.....	97
3.1.1.13	Suggested mechanism according to visible spectra measure.....	101

3.1.2	Absorption spectra of the studied drugs with Eriochromeblack T.....	102
3.1.2.1	Effect of pH.....	102
3.1.2.2	Effect of shaking time.....	105
3.1.2.3	Effect of the polarity of extracting solvents.....	106
3.1.2.4	Effect of reagent concentration.....	106
3.1.2.5	Molar ratio of the complexes.....	107
3.1.2.6	Validity to Beer's law.....	110
3.1.2.7	Accuracy and precision.....	112
3.1.2.8	Determination of the studied drugs in urine samples by using Eriochromeblack T.....	113
3.1.2.9	Analytical application.....	116
3.1.2.10	Suggested mechanism.....	120
3.1.3	Absorption spectra of the studied drugs with Alizarin red S.....	121
3.1.3.1	Effect of pH.....	121
3.1.3.2	Effect of shaking time.....	124
3.1.3.3	Effect of the polarity of extracting solvents.....	125
3.1.3.4	Effect of reagent concentration.....	125
3.1.3.5	Molar ratio of the complexes.....	126
3.1.3.6	Validity to Beer's law.....	129
3.1.3.7	Accuracy and precision.....	131
3.1.3.8	Determination of the studied drugs in urine samples by using Alizarin red S.....	132
3.1.3.9	Analytical application.....	135

3.1.3.10 Suggested mechanism.....	139
Support for the type of formed complex.....	140
The bonding of the reagents with the drugs.....	152
Conclusion.....	154
Summary.....	156
References.....	162
Arabic summary
