

ACKNOWLEDGEMENTS	
ABSTRACT	i
INTRODUCTION	1
CHAPTER I : PRINCIPAL PARAMETRIC RESONANCE OF TWO-DEGREE- OF-FREEDOM SYSTEM WITH QUADRATIC AND CUBIC NON-LINEARITIES	10
f 1.1) : Introduction	10
f 1.2) : problem formulation	11
A : Analysis	13
f 1.3) : Principal parametric resonance of the first mode without internal resonance	19
A : Averaging equations	19
B : Steady state solutions	19
C : Stability analysis	20
f 1.4) : Principal parametric resonance of the first mode with one-to-one internal resonance	22
A : Averaging equations	22
B : Steady state solutions	22
C : Stability analysis	24
f 1.5) : Principal parametric resonance of the first mode with one-to-two internal resonance	27
A : Averaging equations	27
B : Steady state solutions	27

	Page
: Stability analysis	28
§ 1.6) : Principal parametric resonance of the first mode	
with one-to-three internal resonance	29
A : Averaging equations	29
B : Steady state solutions	29
C : Stability analysis	30
§ 1.7) : Principal parametric resonance of the first mode	
with two-to-one internal resonance	31
A : Averaging equations	31
B : Steady state solutions	32
C : Stability analysis	32
§ 1.8) : Principal parametric resonance of the first mode	
with three-to-one internal resonance	33
A : Averaging equations	33
B : Steady state solutions	34
C : Stability analysis	34
§ 1.9) : Numerical results and discussion	36
: Figures	40
§ 1.10) : Summary and conclusion	46

CHAPTER II : COMBINATION PARAMETRIC RESONANCE OF TWO-DEGREE- OF-FREEDOM SYSTEM WITH QUADRATIC AND CUBIC NON- LINEARITIES	47
§ 2.1) : Introduction	47
A : Analysis	48

§ 2.2)	: Combination parametric resonance with absence	
	internal resonance	49
A	: Averaging equations	49
B	: Steady state solutions	50
C	: Stability analysis	51
§ 2.3)	: Combination parametric resonance with one-to-one	
	internal resonance	53
A	: Averaging equations	53
B	: Steady state solutions	53
C	: Stability analysis	54
§ 2.4)	: Combination parametric resonance with one-to-two	
	internal resonance	56
A	: Averaging equations	56
B	: Steady state solutions	57
C	: Stability analysis	57
§ 2.5)	: Combination parametric resonance with one-to-	
	three internal resonance	59
A	: Averaging equations	59
B	: Steady state solutions	59
C	: Stability analysis	60
§ 2.6)	: Combination parametric resonance with two-to-one	
	internal resonance	61
A	: Averaging equations	61
B	: Steady state solutions	62
C	: Stability analysis	62

§ 2.7)	: Combination parametric resonance with three-to-one internal resonance	64
A	: Averaging equations	64
B	: Steady state solutions	64
C	: Stability analysis	65
§ 2.8)	: Numerical results and discussion	66
	: Figures	70
§ 2.9)	: Summary and conclusion	76

CHAPTER III: HARMONIC RESONANCE OF NON-LINEAR SYSTEM OF RODS

	TO A HARMONIC EXCITATION	77
§ 3.1)	: Introduction	77
§ 3.2)	: problem formulation	79
A	: Analysis	85
§ 3.3)	: Harmonic resonance of the second mode with one-to-one internal resonance	85
A	: Averaging equations	85
B	: Steady state solutions	86
C	: Stability analysis	87
§ 3.4)	: Harmonic resonance of the second mode with two-to-one internal resonance	88
A	: Averaging equations	88
B	: Steady state solutions	90
C	: Stability analysis	90
§ 3.5)	: Numerical results and discussion	91

	Page
: Figures	93
§ 3.6) : Summary and conclusion	97
 CHAPTER IV : COMBINATION RESONANCE OF NON-LINEAR SYSTEM OF	
RODS TO A HARMONIC EXCITATION	98
§ 4.1) : Introduction	98
A : Analysis	99
§ 4.2) : Combination resonance with one-to-two internal resonance	106
A : Averaging equations	106
B : Steady state solutions	107
C : Stability analysis	108
§ 4.3) : Combination resonance with two-to-one internal resonance	109
A : Averaging equations	109
B : Steady state solutions	110
C : Stability analysis	110
§ 4.4) : Numerical results and discussion	111
: Figures	113
§ 4.5) : Summary and conclusion	117
 CHAPTER V : RESPONSE OF THREE-DEGREE-OF-FREEDOM SYSTEM WITH	
QUADRATIC NONLINEARITIES TO HARMONIC EXCITATIONS ..	119
§ 5.1) : Introduction	119
§ 5.2) : problem formulation	121

§ 5.3)	: First case: Amplitudes of external excitations	
	of order ε	123
A	: Analysis	123
B	: Averaging equations	124
C	: Steady state solutions	126
D	: Stability analysis	127
§ 5.4)	: Second case: Amplitudes of external excitations	
	of order one	129
A	: Analysis	129
§ 5.5)	: Primary resonance	130
A	: Averaging equations	130
B	: Steady state solutions	131
C	: Stability analysis	132
§ 5.6)	: Sub-harmonic resonance	133
A	: Averaging equations	133
B	: Steady state solutions	134
C	: Stability analysis	135
§ 5.7)	: Super-harmonic resonance	136
A	: Averaging equations	136
B	: Steady state solutions	137
C	: Stability analysis	138
§ 5.8)	: Numerical results and discussion	139
	: Figures	143
§ 5.9)	: Summary and conclusion	146
