

Contents

Chapter	Page
1. Aim of Work	1
II. Review of Literature	4
Tumor associated antigens	5
Purification of tumor extract	9
The leukocyte adherence inhibition assay	13
Cellular mechanism of LAI reaction	18
III. Materials and Methods	21
Part One : Antigenic extracts	22
Part Two : Blood leukocytes	30
Part Three: Leukocyte adherence inhibition assay	42
IV. Results	48
Part One : Studies of prepared extracts	49
Part Two : LAI assay versions	65
Part Three: Cellular mechanism of LAI assay	79
V. Discussion	89
VI. Summary	104
VII. References	108
Arabic Summary	

Illustrations

Table	Page
I. List of tissues used	23
II. Periferal blood leukocyte samples	25
III. Total protein content of prepared extracts	50
IV. Leukocyte adherence following incubation in protein-free medium	51
V. Relationship between extracts concentration and adherence of control leukocytes	53
VI. Specific reactivity of SqCC/UB extracts	56
VII. Specific reactivity of different control extracts	58
VIII. Specific reactivity of Shaem/SEA	59
IX. Effect of isolated fraction of extract on adherence of leukocytes	62
X. Evaluation of different LAI assay versions	66
XI. Specificity of the MTT/microcolorimrtric LAI-assay	70
XII. Three parameter relasionship of the TPC/microcolorimetric-LAI	76
XIII. Specificity of the TPC/microcolourimetric LAI-assay	77
IXV. Effect of SqCC/UB1/83 extract on leukocyte adherence ...	82
XV. Effect of leukocyte subpopulation depletion on specific adherence reduction	84
XVI. Effect of mixed subpopulation cultures	88

Figure	Page
I. Elution profile of SqCC/UB1/82 antigenic extract.....	61
II. Elution profile of standard proteins.....	63
III. Molecular weight standard curve	64
VI. Correlation between PBMC count and measured absorbance using MTT stain	69
V. Correlation between BSA concentration and measured absorbances	72
VI. Correlation between PBMC count and measured absorbance	74
VII. Correlation between PBMC count per microscopic field and measured absorbance.....	75
VIII. Monitoring of lymphocyte subpopulations purity	80
IX. Effect of culture supernatant on the leukocyte subpopulation adherence	86
