	Page
• Introduction.....	
• Aim of the work.....	
• Review of Literature	
<i>*Annexins</i>	
-Definition and discovery of annexins	
-Anatomical location of annexin A5	
-Molecular Structures of annexins	
. Structures of annexin protein cores.....	
. Structures of the unique NH ₂ -terminal annexin domains	
-Biochemical properties of annexins	
. Annexins as Membrane Binding Proteins	
Ca ²⁺ -dependent phospholipid binding	
Ca ²⁺ -independent lipid binding	
. Nonlipid Annexin Ligands:	
Annexin complexes with EF hand-type Ca ²⁺ binding proteins	
Annexin interactions with cytoskeletal proteins	
Other ligands	
-Molecular evolution of the annexin family and regulation of annexin gene expression.	
-Function diversity within the annexin family	
. Annexins in membrane traffic and organization	
Annexins in the biosynthetic pathway	

Annexins in the endocytic pathway

Annexins and phagocytosis

. Annexins and Ion Channels.

Annexin-dependent ion fluxes

. Extracellular Annexin Activities

. Extracellular activities of annexin A5

-Annexin and human diseases

. Heart disease

. Annexin A5 as anticoagulants

. Annexins and Physiological Stress

. Annexins and Cancers

****Anti-annexin A5***

****Miscarriage***

Factors implicated in recurrent miscarriage

- Chromosomal abnormalities

- Numerical abnormalities

- Structural chromosomal abnormalities

- Immunological causes.

- Autoimmune antibodies

Antiphospholipid antibodies (APA)

Features of APS

Pathogenesis of APS

Anti-cardiolipin antibodies (ACA)

Antinuclear antibodies (ANA)

Anti-thyroid antibodies

- Alloimmune mechanisms

Maternal Blocking Antibodies Deficiency

Anti-sperm antibodies

- Blood coagulation protein and platelet defects

- Infective factors relevant to miscarriage

Vaginitis , Endocervicitis and Endometritis

Mycoplasma, Ureaplasma and Chlamydia

Toxoplasma gondii (Toxo)

Untreated Syphilis

Brucellosis

Viruses

Acquired immunodeficiency syndrome

- Endocrine factors associated with miscarriage

Thyroid disease

Diabetes mellitus

Polycystic ovary syndrome (PCOS) and RM

Luteal phase defect (LPD)

- Anatomical uterine defects

Congenital uterine malformations

Acquired uterine defects:

1- Asherman's syndrome

Uterine leiomyoma

Cervical incompetence

- The environmental teratogens

Alcohol

Cocaine

Radiation

Smoking and nicotine

Lead

- Psychological aspects of miscarriage:

Psychological factors as a cause of RM

Psychological reactions to RM

- Unexplained recurrent miscarriages
