| List of tables | i |
| List of figures | iii |
| List of Charts | iii |
| List of abbreviations | iv |
| English Summary | vii |
| General part | 1 |
| Chapter (A) “amino acids and peptides “An Over view” | 2 |
| Chapter (B)”Amino acids & Peptides and Their Conjugates as Potential Pharmaceuticals” | 25 |
| Chapter (C) “Chemistry and biological activity of some aryl and heteroaryl acrylic acid derivatives” | 34 |
| Chapter (D)"The Potential Pharmaceuticals of Piperazine Derivatives" | 45 |
| Chapter (E)"Allergy and Allergic Treatments" | 50 |
| Special part | 56 |
| Original work | |
| Aim and scope of the investigation | 57 |
| Theoretical Discussion | 67 |

| | |
|---|------------|
| 1. Synthetic chemistry of <i>N</i>-cinnamoyl, <i>N</i>-3-(2-thienyl), <i>N</i>-3-(2-furyl) and <i>N</i>-[5-methyl-(3-(2-furyl)] acryloyl amino acid and peptide conjugates | 68 |
| 2. Spectral characteristics of <i>N</i>-aryl and <i>N</i>-heteroaryl amino acid and peptide conjugates | 79 |
| 3. Anti-allergic and anti-inflammatory potencies of <i>N</i>-aryl and <i>N</i>-heteroaryl acryloyl amino acid and peptide conjugates | 97 |
| A) The comparative anti-allergic potencies of the prepared candidates | 97 |
| B) The comparative anti-inflammatory potencies of the prepared candidates | 107 |
| Approaching a qualitative structure/activity relationship for the candidates | 115 |
| C) Conclusion | 116 |
| Experimental Part | 117 |
| Biological Evaluation | 164 |
