

CONTENTS

	Page
INTRODUCTION AND AIM OF THE WORK.....	1
REVIEW OF LITERATURE	2
- Chemical structure of saponin	2
- Natural distribution of saponin.....	3
- Biosynthesis of saponin	6
- Biological activities of saponin:	
- Molluscicidal activity	9
- Hemolytic activity.....	14
- Miscellaneous activities.....	17
- Control of nematodes.....	18
- Saponin production by cell and tissue cultures.....	22
- Gene transfer systems in <i>Azotobacter sp.</i>	26
- Gene transfer systems in <i>Escherichia coli</i>	29
MATERIALS AND METHODS.....	33
- Preparation of saponin from donor organisms.....	36
- Determination of saponin type.....	36
- Preparation of donor DNA:	
- High molecular weight DNA	37
- Direct isolation of chromatin	38
- Isolation of DNA from fresh plant tissue.....	38

- Preparation of snail DNA.....	39
- Estimation of DNA concentration	40
- Estimation of DNA purity.....	41
- Transformation protocols of :	
- <i>Azotobacter sp.</i>	41
- <i>E. coli</i>	42
- Assay of biological activity of saponin:	
- Snail mortality	44
- Nematode mortality.....	45
- Hemolytic activity.....	45
- Purification of saponin from transformed <i>E. coli</i> culture.....	46
RESULTS AND DISCUSSIONS.....	47
ENGLISH SUMMARY	92
REFERENCES.....	97
