CHAPTER I: MODE OF OCCURRENCE AND PHYSICAL PROCESSING OF MONAZITE SANDS

I.1. CHEMISTRY OF MONAZITE

I.1.1. Chemical Composition and Characteristics

I.1.2. Identification

I.2. MODE OF MONAZITE OCCURRENCE AND DISTRIBUTION

I.2.1. World Distribution of Monazite Deposits in the World

I.2.2. Distribution of Egyptian Monazite Deposits

I.2.2.1. Beach Sands and Sand Bars

I.2.2.1.1. Gazza-Port Fouad Area

I.2.2.1.2. Port Said-Damietta Area

I.2.2.1.3. Ras El-Bar-Burg El-Burullus Area

I.2.2.1.4. East Rosetta Area

I.2.2.1.5. West Rosetta Area

I.2.2.2. Submerged Sediments

I.2.2.3. Sandy Pouches Intercalating Delta Mud

I.3. PHYSICAL PROCESSING OF MONAZITE

I.3.1. World Examples of Preparing Monazite Concentrates

I.3.2. Preparation of Monazite Concentrate in Egypt

CHAPTER II: THEORETICAL ASPECTS AND LITERATURE REVIEW

II.1. ION CHROMATOGRAPHY

II.1.1. General Principles

II.1.1.1. Detectors for Ion Chromatography

II. 1.1.2. Anion and Cation Chromatography

II.1.2. Ion Chromatography of Uranium, Thorium and Rare Earth
Elements (REE)

II.2. BREAKDOWN OF MONAZITE SAND CONCENTRATE

II.2.1. Acid Opening Methods

II.2.1.1. Sulfuric Acid Opening Method

II.2.1.2. Opening with Nitric Acid

II.2.1.3. Opening with Perchloric Acid

II.2.2. Alkali Opening Methods

II.2.2.1. Alkali Fusion	24
II.2.2.2. Opening with Aqueous Caustic Soda	24
II.2.3. Chlorination of Monazite	27
II.3. RECOVERY OF URANIUM, THORIUM AND RARE EARTHS FROM MONAZITE LEACH LIQUORS	28
II.3.1. Precipitation Techniques	28
II.3.1.1. Precipitation from Monazite Sulfate liquor	28
II.3.1.2. Precipitation from Alkali-Opened Monazite Liquors	30
II.3.2. Ion Exchange Resins	32
II.3.3. Solvent Extraction Techniques	34
II.3.3.1. Tributyl Phosphate/Nitrate System	35
II.3.3.2. Amines/Sulfate System	35
II.3.3.3. Mechanism of Th/U Extraction by Organic Solvents	40
 CHAPTER III: EXPERIMENTAL	
III.1. CHEMICALS AND REAGENTS	43
III.2. ORE CHARACTERIZATION	43
III.3. ANALYTICAL DEVELOPMENT OF IC METHOD FOR URANIUM, THORIUM AND REE DETERMINATION	45
III.3.1. Instrumentation	46
III.3.2. Preparation of Eluents and Standard Solutions	50
III.3.2.1. Hydrochloric Acid Eluent	50
III.3.2.2. Ammonium Sulfate Eluent	50
III.3.2.3. Postcolumn Reagent	50
III.3.2.4. Analytical Standards	50
III.4. PROCEDURE OF MONAZITE BREAKDOWN WITH SULFURIC ACID	52
III.5. PROCEDURES FOR RECOVERY OF U, Th AND REE	52
III.5.1. Selective Precipitation Method	52
III.5.2. Procedure of U Recovery by Ion Exchange	53
III.5.2.1. Uranium Adsorption	53
III.5.2.2. Uranium Elution	53
III.5.3. Procedure of U and Th Recovery by Solvent Extraction (Dodecylamine)	53
III.5.3.1. Extraction Procedure	53
III.5.3.2. Stripping Procedure	54
 CHAPTER IV: RESULTS AND DISCUSSION	
IV.1. OPTIMIZATION OF IC PARAMETERS FOR THE ANALYSIS OF U, Th AND REE	55
IV.1.1. Effect of Eluent Flow Rate (FR)	55
IV.1.2. Effect of HCl Concentration	57
IV.1.3. Effect of Ammonium Sulfate Concentration	58
IV.2. SULFURIC ACID DISSOLUTION OF EGYPTIAN MONAZITE	61
IV. 2.1. Study of the Relevant Factors	61
IV.2.1.1. Effect of Acid Input	61

IV.2.1.2. Effect of Grain Size	63
IV.2.1.3. Effect of Solid/Liquid Ratio	65
IV.2.1.4. Effect of Agitation Time	67
IV.2.1.5. Effect of Temperature	69
IV.2.2. Choice of the Optimum Conditions	71
IV.3. RECOVERY OF URANIUM, THORIUM AND RARE EARTHS	71
IV.3.1. Results of Selective Precipitation	72
IV.3.2. Recovery of U by Ion-Exchange	75
IV.3.2. 1. Uranium Adsorption	75
IV.3.2. 2. Uranium Elution	78
IV.3.3. Potentiality of Dodecylamine for the Recovery of U and Th	80
IV.3.3.1. Study of the Relevant Extraction Conditions	80
IV.3.3.1.1. Effect of Dodecylamine Concentration	80
IV.3.3.1.2. Effect of pH	83
IV.3.3.1.3. Effect of Diluent	85
IV.3.3.1.4. Effect of the Extraction Temperature	85
IV.3.3.2. Molar Ratio vs Extraction Mechanism	86
IV.3.3.3. McCabe-Thiele Extraction Diagrams	89
IV.3.3.4. Study of Stripping Conditions	94
IV.3.3.4.1. Preparation of Loaded Organic Liquor	94
IV.3.3.4.2. Effect of Nitric Acid Concentration	97
IV.3.3.4.3. Effect of Aqueous/Organic Phase Volume Ratio	98
CHAPTER V: SUMMARY AND CONCLUSION	102
