### INTRODUCTION

|                                                                            |    |
|----------------------------------------------------------------------------|----|
| - Anatomy of tonsils and adenoids-----                                     | 1  |
| - Histology of tonsils and adenoids-----                                   | 6  |
| - Chronic tonsillitis and adenoiditis-----                                 | 10 |
| - Functions of tonsils and adenoids-----                                   | 16 |
| - Cell population of tonsils and adenoids-----                             | 19 |
| - Immunological role of tonsils and adenoids-----                          | 23 |
| - The body reaction to virus infection-----                                | 33 |
| - Virus infections of lymphatic tissues of upper<br>respiratory tract----- | 42 |

|                            |    |
|----------------------------|----|
| MATERIALS AND METHODS----- | 62 |
| RESULTS-----               | 73 |
| DISCUSSION-----            | 86 |
| SUMMARY-----               | 93 |
| REFERENCES-----            | 94 |
| APPENDIX-----              | .. |

## LIST OF TABLES

|                                                                                                   | <u>Page</u> |
|---------------------------------------------------------------------------------------------------|-------------|
| 1. Tonsils and adenoids cytopathic changes and viral inclusion bodies-----                        | 77          |
| 2. Tonsillar and adenoid lymphoid follicles reactivity.-----                                      | 78          |
| 3. Virus isolation in suckling mice inoculation-----                                              | 79          |
| 4. Paraffin Sections of tonsils and adenoids stained with fluorescein labelled antihuman IgE----- | 80          |
| 5. Isolation of a Vero cell culture cytopathogenic agent from tonsils and adenoids-----           | 81          |
| 6. Neutralization test with standard enterovirus pooled antisera.-----                            | 82          |

## LIST OF FIGURES

|                                                                                                                                                              | <u>Page</u> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Fig.(1): Diagrammatic representation of the embedded type of tonsil and the superficial type-----                                                            | 17          |
| Fig.(2): Tonsillar print shows a large histiocyte with basophilic intracytoplasmic inclusions. Hx & E ( x1250)-----                                          | 83          |
| Fig.(3): Tonsillar print shows multinucleated cy-<br>ncytium (right)and histiocyte with basophilic intracytoplasmic inclusions (left)<br>Hx & E (x1250)----- | 84          |
| Fig.(4): Tonsillar section shows follicular hyper-<br>lasia with reactive germinal centers<br>Mx & E (12.5x10x)-----                                         | 85          |
