|                                                          | Page |
|----------------------------------------------------------|------|
| <b>Chapter I</b>                                         |      |
| Introduction .....                                       | 1    |
| <b>Chapter II</b>                                        |      |
| Aim of The Work .....                                    | 5    |
| <b>Chapter III</b>                                       |      |
| Review of The Literature .....                           | 6    |
| - Surgical anatomy of the brain .....                    | 6    |
| - Pathology of Head Injury .....                         | 18   |
| - Management of post traumatic unconscious patients .... | 33   |
| - Pediatric head injury .....                            | 80   |
| <b>Chapter IV</b>                                        |      |
| Material .....                                           | 88   |
| <b>Chapter V</b>                                         |      |
| Methods .....                                            | 89   |
| <b>Chapter VI</b>                                        |      |
| Results .....                                            | 100  |
| <b>Chapter VII</b>                                       |      |
| Discussion .....                                         | 124  |
| <b>Chapter VIII</b>                                      |      |
| Summary .....                                            | 139  |
| <b>Chapter IX</b>                                        |      |
| Conclusions .....                                        | 144  |
| <b>Chapter X</b>                                         |      |
| Recommendations .....                                    | 146  |
| <b>Chapter XI</b>                                        |      |
| References .....                                         | 148  |
| Arabic Summary .....                                     | -    |

## LIST OF ABBREVIATION

|           |                               |
|-----------|-------------------------------|
| A.P. view | Antero-posterior view.        |
| C.T       | Computed tomography.          |
| D.A.I     | Diffuse axonal injury.        |
| D.P.L     | Diagnostic peritoneal lavage. |
| E.E.G     | Electroencephalogram.         |
| EPs       | Evoked potentials.            |
| G.C.S     | Glasgow Coma Scale.           |
| I.C.P     | Intracranial pressure.        |
| M.R.I     | Magnetic resonance imaging.   |
| R.T.A     | Road traffic accidents.       |
