

CONTENTS

	Page
Introduction	I-II
-Anatomic considerations	1-15
*Historical insights	1
*Gross anatomy of cardiac conduction system	1
*Surgical anatomy of preexcitation syndromes.....	8
*Surgical gross anatomy of atrioventricular node.....	13
-Physiology of the specialized conductive system	16-18
-Pathogenesis of cardiac arrhythmias	19-46
*Disorders of impulse formation	19
*Disorders of impulse conduction	21
*Combined disorders of impulse formation and conduction	25
*Scope of surgery of cardiac arrhythmias	27-46
-Supraventricular tachycardia related to preexcita-	
tion	27
-Supraventricular tachycardia unrelated to preexci-	
tation	35
-Ventricular tachycardias	37
-Bradyarrhythmias	44
-Peoperative investigations	47-76
*Non invasive techniques	47
*Invasive techniques.....	57
-The non surgical treatment of arrhythmias	77-94
*Medical treatment	77
*Catheter ablation	83
*Cardiac pacemakers	86

-Surgical treatment of cardiac arrhythmias	95-163
*Patient selection for surgery	95
*Intraoperative mapping	100
*Surgical techniques	119-156
-Supraventricular tachycardias	119
-Ventricular tachycardias	143
-Role of the automatic implantable cardioverter defibrillator in the surgical management of ventricular tachyarrhythmias	157
-Results of surgery	164
-Summary	168
-References	173
-Arabic summary
