

CONTENTS

I- Introduction	5
II Anatomical Review :	8
The anatomy of the portal venous system.	8
Venous anatomy at the cardia.	10
Grading of oesophageal varices.	20
Pathogenesis of bleeding varices.	21
Hepatic collateral circulation :	27
Arterial channel.	27
Portal channels .	30
Hepatopetal pathways.	31
Hepatofugal flow.	31
III- Pathogenesis of Oesophageal Varices :	34
Pathophysiology of portal hypertension	35
Intrahepatic portal hypertension.	38
Extrahepatic presinusoidal portal hypertension	39
Intraheptic presinusoidal portal hypertension	41
Oesophageal and gastric varices formation	42
IV- Haemodynamics in Portal Circulation	45
Wedge hepatic venous pressure	47
Transhepatic measurement.	48
Intrasplenic puncture	49
Operative measurement.	49

Variceal pressure	49
Estimation of hepatic blood flow	49
Estimation of portal systemic collateral flows	52
Oesophageal variceal blood flow.	53
V- Diagnosis	54
- Endoscopy	55
- Barium swallow	57
- Visualisation of the portal venous system :	58
A- Indirect angiography	59
B- Digital subtraction angiography	59
C- Splenic venography	60
D- Scinti - photo spleno portography	60
E- Transheptic portography	62
F- Scanning procedures	62
- Portal venous manometry	62
- Tamponade	63
- Doppler ultrasound	63
VI- Resuscitation :	65
- Supportive and adjuvant therapy	66
- Correction of coagulation defects	66
- Prevention of hepatic coma	67
-Other adjuvant measures	71

VII- Control of Bleeding	72
I- Vasopressin therapy	72
II- Somatostatin.	76
III- Propranolol	76
IV Tamponade	78
V - Percutaneous transhepatic obliteration of varices	81
VI Splenic embolization.	85
VII Endoscopic thermal haemostasis	86
A- Electrocautary	86
B- Laser photocoagulation.	86
VII- Injection sclerotherapy.	87
XI Endoscopic variceal banding.	90
VIII - Emergency Surgery :	92
Emergency shunt	92
Oesophageal variceal ligation and resection	98
Devascularization procedure.	100
Transjugular intrahepatic portasystemic shunt.	102
Circumferential suture technique	102
IX- EEA Stapling For Control Of Variceal Haemorrhage	104
Control of haemorrhage	106
Effect of transection on portal haemodynamics	107
Morbidity and mortality.	107
Advantages of the procedure	110

Disadvantages and complications of the procedure	111
Complications.	112
X- Material and Methods.	114
The clinical and laboratory assessment	114
Technique of operation.	118
Post operative care.	132
Results	133
Post-operative complications.	133
Effectiveness of oesophageal stapling	146
XI Discussion	149
XII Summary and Conclusion.	151
XIII References.	152
XIV Arabic Summary.
