|--|------|--|
| INTRODUCTION | 1 | |
| AIM OF THE WORK. | 3 | |
| REVIEW OF THE LITERATURE: | 4 | |
| ***Historical background of DM. | 4 | |
| ***Diagnosis & classification of DM: | 6 | |
| -Definition and description of diabetes mellitus | 6 | |
| -Classification of diabetes mellitus and other categories of | 8 | |
| glucose regulation. | 16 | |
| -Type 1 diabetes. | 18 | |
| -Type 2 diabetesOther specific types of diabetes. | | |
| -Impaired glucose tolerance (IGT) and impaired fasting | 20 | |
| glucose (IFG). | 28 | |
| -Diagnostic criteria for diabetes mellitus. | 30 | |
| *** The epidemiology of type 2 diabetes: | 37 | |
| - Descriptive epidemiology of type 2 diabetes. | 37 | |
| - Distribution of type 2 diabetes by ethnicity. | 39 | |
| - Temporal trends. | 46 | |
| - Epidemiology of diabetes mellitus in Egypt. | 47 | |
| - Egyptian ethnic groups. | 49 | |
| - Prevalence of diabetes mellitus in Egypt. | 53 | |
| *** Establishing the role of gene-environmental | | |
| interactions in the etiology of type 2 diabetes: | 54 | |
| -Genetic factors in the etiology of type 2 diabetes. | 54 | |
| - Environmental factors in the etiology of type 2 diabetes. | 59 | |
| - Evidence of interactions between genetic and | | |

| | environmental factors in the etiology of type 2 | 59 |
|----|--|-----|
| | diabetes. - Should studies of interaction treat diabetes as a binary | 60 |
| | state or as part of the continuum. | |
| ÷, | - Proven examples of gene-environmental interactions | 63 |
| | in type 2 diabetes.How large do studies need to detect gene- | |
| | environmental interactions? | 67 |
| | environmental interactions. | |
| | **Obesity and diabetes: | 69 |
| | Definition of obesity. | 69 |
| | Measurement of obesity. | 70 |
| | Insulin resistance, beta-cell dysfunction and obesity. | 75 |
| | Leptin. | 77 |
| | Uncoupling proteins. | 78 |
| | Insulin signailing. | 79 |
| | TNF-a. | 80 |
| | Tyrosine phosphatase- 1B enzyme. | 80 |
| | Genetic of obesity and type 2 diabetes. | 82 |
| | Environmental factors in type 2 diabetes and obesity. | 83 |
| | **Insulin resistance: | 84 |
| | Definition. | 84 |
| | Pathophysiology. | 84 |
| | Types. | 91 |
| | What is the major site of insulin resistance. | 93 |
| | Clinical significance of insulin resistance. | 96 |
| | Insulin resistance versus insulin deficiency in type 2 | |
| | diabetes. | 98 |
| | Treatment of insulin resistance syndrome. | 101 |
| | Effect of insulin on other metabolic activities. | 105 |
| | **Hepatic insulin clearance: | 107 |
| | -Definition. | 107 |
| | -Physiology. | 107 |
| | -Physiology. -Hepatic insulin clearance in different physiologic and pathologic states. | 111 |
| | paniologic states. | |

| SUBJECTS AND METHODS: | 117 |
|---|-------------------|
| Selection of patients. Laboratory investigations. Statistical analysis. | 118 120 127 |
| RESULTS: | 131 |
| Analysis of results. Tables and figures. | 132 139 |
| DISCUSSION | 182 |
| SUMMARY AND CONCLUSION. | 206 |
| REFERENCES | 214 |
| ADARIC SUMMARY. | |
