

CONTENTS

❖	INTRODUCTION
❖	AIM OF THE WORK
❖	REVIEW OF LITERATURE
	I- Water
	A- Water Quality and its relation to diseases.....
	B- Water Sources and Possible Causes of Contamination...
	C- Bacterial Indicators
	D- Water Treatment
	E- Bacterial Regrowth in Water Distributing System
	II- Bacteriological Testing of Water Supplies
	1- Plate Count Method
	2- Bacteriological Testing for Coliform Group
	3- Bacteriological Testing for <i>Faecal Streptococci</i>
	4- Bacteriological Testing for <i>Clostridium Perfringens</i>
	5- Bacteriological Standards of Water Quality.....
	6- Bacteriological Testing for Water Pathogens.....
	III- Indicator organisms
	- <i>Escherichia coli</i>
	- <i>Faecal Streptococci</i>
	- <i>Clostridium perfringens</i>
	IV- Pathogenic organisms
	- <i>Salmonellae</i>
	- <i>Shigellae</i>
	- <i>Vibrios</i>
	V- Opportunistic pathogens
	- <i>Aeromonas</i>
	- <i>Pseudomonas Aeruginosa</i>
	- <i>Legionellae</i>
	- <i>Faecal Kelbsiella</i>
	- Atypical <i>Mycobacteria</i>
	- <i>Staphylococcus auerus</i>
	- <i>Flavobacterium</i>
