## *CONTENTS*

<b>*LIST OF ABBREVIATIONS</b>	I
<b>*LIST OF TABLES</b>	V
<b>*LIST OF FIGURES</b>	VI
<b>*INTRODUCTION</b>	1
<b>*AIM OF THE WORK</b>	5
<b>* CHAPTER (1) GENE THERAPY</b>	
• History of Genetics in Medicine	6
• Impact of Genetics in Medicine	7
• Molecular basis of inheritance	8
• Gene therapy	13
• History of gene therapy research	14
• Current status of gene therapy	22
• Types of Gene therapy	24
• Risks and Benefits of gene therapy	28

---

• The Human Genome Project	31
----------------------------	----

**\* CHAPTER (2) GENE THERAPY STRATEGIES**

• Strategies for Gene Therapy	33
• Gene delivery	36
• Basic strategies for gene transfer	46

**CHAPTER (3) GENE THERAPY FOR NEUROLOGICAL DISORDERS**

• Introduction	52
• Vector systems for delivery of genetic material to CNS	53
• Neurological disorders amenable for gene therapy	56
• Gene therapy for neurodegenerative diseases	58
• Parkinson's disease (PD)	59
• Alzheimer's disease (AD)	65
• Huntington's disease (HD)	70
• Multiple Sclerosis (MS)	73
• Gillian Barre' Syndrome (GBS)	82

---

• Muscular dystrophies (MD)	85
• Duchenne muscular dystrophies (DMD)	89
• Becker muscular dystrophies (BMD)	98
• Brain Tumors	101
• Gene therapy of Brain Tumors	105
• Neurofibromatosis	118
• Lysosomal Storage Disorders (LSD)	122
• Other Genetic diseases of CNS	132
<b>*SUMMARY AND CONCLUSION</b>	<b>135</b>
<b>*REFERENCES</b>	<b>140</b>
<b>*ARABIC SUMMARY</b>	<b>3-1</b>
