LIST OF TABLES	x
LIST OF FIGURES	xiii
LIST OF SYMBOLS	xxiii

CHAPTER 1 (INTRODUCTION)

1.1 General	1-1
1.2 Problem Statement	1-2
1.3 Study Objective	1-4
1.3.1 Flow Field around Vertical Bridge Abutment	1-4
1.3.2 Scour Pattern at Vertical Bridge Abutment	1-4
1.4 Methodology	1-5
1.5 Study Outline	1-5

CHAPTER 2 (LITERATURE REVIEW)

2.1 Cohesive Soil	2-1
2.1.1 Soil Classification	2-1
2.1.2 Clay Mineralogy	2-2
2.1.3 Sediment Characteristics	2-2
2.2 Erosion of Cohesive Soil	2-4
2.2.1 Erosion Modes	2-4
2.2.2 Erosion Process	2-6
2.2.3 Factors Controlling Erosion Process	2-7

2.2.3.1 <i>Chemical and Electro-Chemical Properties</i>	2-8
2.2.3.2 <i>Physical and Mechanical Properties</i>	2-10
2.2.3.3 <i>Biological Properties</i>	2-15
2.2.3.4 <i>Physical and Chemical Properties of Flow</i>	2-16
2.2.4 Erosion Potential	2-18
2.2.4.1 <i>Permissible Velocity</i>	2-19
2.2.4.2 <i>Erosion Resistance</i>	2-19
2.2.4.3 <i>Erosion Rate</i>	2-23
2.3 Scour	2-26
2.3.1 Local Scour at Bridge Abutments	2-27
2.3.1.1 <i>Clear Water Scour</i>	2-27
2.3.1.2 <i>Live Bed Scour</i>	2-27
2.3.2 Flow Field	2-29
2.3.2.1 <i>Down Flow</i>	2-29
2.3.2.2 <i>Primary Vortex</i>	2-30
2.3.2.3 <i>Secondary Vortex</i>	2-30
2.3.2.4 <i>Wake Vortices</i>	2-31
2.3.3 Scour Mechanism	2-32
2.3.4 Equilibrium Scour Depth	2-32
2.3.4.1 <i>The Regime Method of Scour Depth Prediction</i>	2-33
2.3.4.2 <i>The Dimensional Analysis Method of Scour Depth Prediction</i>	2-33
2.3.4.3 <i>The Analytical or Semi Empirical Approach Method of Scour Depth Prediction</i>	2-35
2.3.5 Abutment Scour in Cohesive Soil	2-37
2.3.6 Comment on Previous Studies for Abutment Scour in Cohesive Soil ...	2-41
