

Introduction and aim of work .....	1
Chapter (1) Upper airway anatomy .....	7
Chapter (2) Physiology of sleep and respiration during sleep.....	14
Chapter (3) Pathophysiology of obstructive sleep apnea syndrome...	21
Chapter (4) Diagnosis of obstructive sleep apnea .....	32
Chapter (5) Physical examination .....	37

- *General appearance.*
- *Craniofacial Skeleton.*
- *Neck examination.*
- *Nasal examination.*
- *Nasopharynx.*
- *Oral cavity and oropharynx.*  
*and Hypopharynx.*

Chapter (6) Localization of sites of obstructions.....	51
--	----

(I) Endoscopy.....	52
--------------------	----

\* *Nasopharyngoscopy.*

\* *Sleep endoscopy.*

(II) Upper airway measurements.....	60
-------------------------------------	----

*Acoustic reflection.*

- *Acoustic pharyngometry.*
- *Acoustic rhinometry.*
- *Rhinometrics*

*Pharyngomanometry (Catheters).*

**(III) Radiology.....79**

*\*Cephalometry.*

*\* Fluroscopy.*

*\* Computed Tomography (CT).*

*\*Magnetic Resonance Imaging (MRI).*

*\*Virtual (computed) Endoscopy.*

*\*Anatomical Optical coherence Tomography (aOCT).*

**Chapter (7) Treatment of obstructive sleep apnea .....108**

**A. Non-surgical treatment.**

**B. Surgical treatment.**

**Summary.....124**

**References.....129**

**Arabic summary.....145**
