List of Tables

Page

Table I : Number and Percentage distribution of children according to their cause of fever.

67

Table II : Number and Percentage distribution of the mothers according to their number of children.

68

Table III : Number and Percentage distribution of the mothers according to their knowledge about body temperature.

69

Table IV : Number and Percentage distribution of mothers according to their knowledge about fever.

71

Table V : Number and Percentage distribution of mothers about seeking medical help and the child's care giver.

72

Table VI : Number and Percentage distribution of mothers according to their practices during fever.

73

Table VII : Relation of mother's age and their knowledge about body temperature.

75

Table VIII : Relation of mother's age and their knowledge about fever.

78

Table IX : Relation of mother's age and their knowledge about seeking medical help and the child's care giver.

80

Table X : Relation of mother's age and sources of their knowledge.

82

List of Tables

Page

Table XI : Relation of mother's age and their practices about fever.	84
Table XII : Relation of mother's level of education and their knowledge about body temperature.	86
Table XIII : Relation of mother's level of education and their knowledge about fever.	88
Table XIV : Relation of mother's level of education and their knowledge about seeking medical help and the child's care giver.	90
Table XV : Relation of mother's level of education and practices about fever.	92
Table XVI : Relation of mother's according to their number of children and their knowledge about body temperature.	94
Table XVII : Relation of mother's according to their number of children and their knowledge about fever.	96
Table XVIII : Relation of mother's according to their number of children and their knowledge about seeking medical help and the child's care giver .	98
Table XIX : Relation of mother's according to their number of children and their practices about fever.	100
