❖ INTRODUCTION	1
❖ AIM OF THE STUDY	5
❖ REVIEW OF LITERATURE	
<i>Chapter one:</i>	
DIABETES MELLITUS	
- Definition	6
- Prevalence of diabetes mellitus	6
- Classification and type of diabetes mellitus.....	8
- Normal physiology	12
- Etiology and pathogenesis of diabetes mellitus	13
- Diagnosis/ clinical manifestation	15
- Complication of diabetes mellitus	19
<i>Chapter two:</i>	
NON INSULIN DEPENDENT DIABETES MELLITUS	
- Definition	26
- Prevalence	27
- Etiology	29
- Classification	32
- Clinical manifestation	33
- Pathophysiology	37
- Diagnosis	38
- Complication.....	40
<i>Chapter three</i>	
DIABETIC FOOT	
- Anatomical consideration	48
- Grades of diabetic foot	57
- Pathology of peripheral neuropathy	59
* Vascular insufficient an infection	63
* Symptoms and signs of vascular insufficiency.....	64
- Bacteriology of diabetic foot	65
- Clinical presentation of diabetic foot	67
* Ulcer	67
* Infection of nail	68
* Gangrene	68

Chapter four:	
NURSING MANAGEMENT	
- Community health nursing role toward NIDDM & diabetic foot.....	72
1- Promotion role.....	75
2- Prevention and control role	76
3- Early detection and treatment role	81
4- Rehabilitative role	87
5- Common misconception among diabetic patient regarding management of diabetes.....	89
❖ MATERIAL AND METHODS	99
❖ RESULTS	104
❖ DISCUSSION	138
❖ SUMMARY	150
❖ CONCLUSION AND RECOMMENDATION	157
❖ REFERENCES	160
❖ APPENDIX	
❖ ARABIC SUMMARY
