|----------------------------------------------------------------------------------|------|
| INTRODUCTION .....                                                               | 1    |
| AIM OF THE WORK .....                                                            | 4    |
| REVIEW OF LITERATURE .....                                                       | 5    |
| History and development of hormonal<br>contraceptives .....                      | 5    |
| Biochemistry and physiology of<br>Steroidal oral contraceptives .....            | 8    |
| Metabolism and mechanism of action<br>of hormonal contraceptives .....           | 10   |
| Pharmacology of steroid contraception .....                                      | 18   |
| Variants of hormonal oral contraceptives .....                                   | 22   |
| The ideal OCs and OCs available in Egypt<br>OCs and interaction with drugs ..... | 23   |
| * Plasma lipids .....                                                            | 26   |
| Total serum lipids .....                                                         | 26   |
| Cholesterol .....                                                                | 27   |
| Triglycerides .....                                                              | 29   |
| Lipoproteins in plasma .....                                                     | 30   |
| Chylomicrons .....                                                               | 31   |
| VLDL-c, IDL-c and LDL-c .....                                                    | 32   |
| High density lipoproteins .....                                                  | 34   |
| Apolipoproteins .....                                                            | 38   |
| Factors affecting serum lipids .....                                             | 40   |
| Metabolism of lipids .....                                                       | 41   |

|                                                           |         |
|-----------------------------------------------------------|---------|
| Separation and estimation of serum lipids .....           | 46      |
| Clinical interrelationships of lipids                     |         |
| and lipoproteins .....                                    | 48      |
| Hormones and lipids .....                                 | 51      |
| OCs pills induced plasma lipid changes .....              | 53      |
| * <b>Effect of Gonadal steroids on serum lipids</b> ..... | 55      |
| Estrogen and serum lipids .....                           | 57      |
| Serum lipids with progestogen-only                        |         |
| contraceptives .....                                      | 60      |
| Androgens and serum lipids .....                          | 66      |
| Effect of COCs on serum lipids .....                      | 67      |
| Changes in lipid metabolism with OCs                      |         |
| containing EE/Gestodene .....                             | 72      |
