List of Abbreviations

6MP	6 mercapto purine
ACIP	Advisory Committee on Immunization Practices
AIDS	Aquired immuno deficiency syndrome
ALL	Acute lymphoblastic leukemia
AML	Acute myloid leukemia
ANC	Absolute neutrophil count
ARA-C	Cytarabine
BCG	Bacillus Calmette-Guerin vaccine
CBC	Complete blood count
CDC	Centers for Disease Control and Prevention
CMV	Cyto-megalo virus
CYCLO	Cyclophosphamid
DOX	Doxorubicin
EORTC	European Organization for Research and Treatment of

Cancer

FDA	Food and drug administration
G-CSF	Granulocyte colony stimulating factor
HSV	Herps simplex virus
ICU	Intensive care unit
IDSA	Infectious Diseases Society of America
MIC	Minimal inhibitory concentration
MTX	Methotraxate
NHL	Non hodgkin's lymphoma
PICU	Pediatric intensive care unit
PMNs	Poly morphic nuclear cells
RSV	Respiratory Syncytial Virus
TMP-SMZ	Trimethoprim-sulfamethoxazole
VCR	Vincristin

List of Tables

Pages

<i>Table (1):</i>	
Bacterial causes of febrile episodes in neutropenic patients.	7
<i>Table (2):</i>	
Factors that favor a low risk for severe infection among patients with neutropenia.	
26	
<i>Table (3):</i>	
Demographic features of the studied patients.	65
<i>Table (4):</i>	
Demographic features of the studied patients.	65
<i>Table (5):</i>	
Residence of the patients.	
66	
<i>Table (6):</i>	
Admission features of the studied patients.	66
<i>Table (7):</i>	
Initial diseases of the studied patients.	68
<i>Table (8):</i>	

Table (9):

Type of organism in the two studied groups.

70

Table (10):

The correlation between the causative organism and outcome.

70

Table (11):

Type of chemotherapy in the two studied groups.

71

Table (12):

Chemotherapy received prior episode.

72

Table (13):

Antifungal types used in the two studied groups.

73

Table (14):

Demographic features of the studied patients.

74

Table (15):

Demographic features of the studied patients.

74

Table (16):

Residence of admitted patients.

75

Table (17):

Admission features of the studied patients.

75

Table (18)

Initial diagnosis of admitted patients.

77	
Table (19):	Laboratory results of the studied patients.
77	
Table (20):	Type of organism in the two studied groups.
78	
Table (21):	The morbidity of the organisms in the two studied groups.
78	
Table (22):	Type of chemotherapy in the two studied groups.
78	
Table (23):	Clinical presentation upon admission.
79	
Table (24):	Antifungal types used in the two studied groups.
80	

List of Figures

	<i>Pages</i>
Figure (1):	
From Practical Algorithms in Pediatric Hematology and Oncology	48
Figure (2):	
Bactec pediatric culture vials (1-3ml)	61

Figure (3):
Distribution of sex in the patients according to the outcome.
65

Figure (4):
Distribution of residences in our patients.
66

Figure (5):
**Duration of neutropenia (days) in the two studied groups
classified according to line outcome.**
67

Figure (6):
**Antibiotic shift and day 7 fever in the two studied groups
classified according to line outcome.**
67

Figure (7):
**Disease types in the three studied groups classified according to
line outcome.**
68

Figure (8):
**ICU admission in the two studied groups classified according
to line outcome.**
69

Figure (9):
**Distribution of *Klebsiella* or *Pseudomonas* in the two studied
groups classified according to line outcome.**
71

Figure (10):
Distribution of received chemotherapy.

71

Figure (11):

Distribution of received chemotherapy.

72

Figure (12):

Relation of sex in PICU admission.

74

Figure (13):

Distribution of admitted patient's residency.

75

Figure (14):

**Duration of neutropenia (days) in the two studied groups
classified according to ICU admission.**

76

Figure (15):

**Antibiotic shift and day 7 fever in the two studied groups
classified according to ICU admission.**

76

Figure (16):

**Disease types in the three studied groups classified according to
ICU admission.**

78

Figure (17):

Distribution of chemotherapy received prior admission.
