

I

Contents

	Page
* INTRODUCTION AND AIM OF THE WORK.....	
* Bilirubin metabolism	
- Chemical structure and properties	1
- Production	6
- Transport	8
- Hepatic uptake	9
- Conjugation	12
- Excretion	13
- Entero hepatic circulation	13
* Fetal bilirubin metabolism	13
* Neonatal Hyperbilirubinemia	16
- Aetiologic classifications	16
- Physiological Jaundice	21
- Pathological Jaundice	23
- Unconjugated hyperbilirubinemia	27
- Conjugated hyperbilirubinemia	32
* Complications of Hyperbilirubinemia	38
* ADVANCEMENT OF DERMAL ICTERUS	
IN NEWBORN.....	43
* INVESTIGATIONS OF NEONATAL	
HYPERBILIRUBINEMIA	50
- Estimation of serum bilirubin	51

II

	Page
- A: Evelyn-Hollery Diazo method	51
- B: American optical Bilirubinometer.....	51
- Transcutaneous Bilirubin determination in newwborn infants	56
1- The Icterometer	56
2- Minolta Air sheild gaundicemeter	62
* MANAGEMENT OF NEONATAL HYPERBILIRBINOMEMIA	65
- Exchange transfusion	66
- Phototherapy	72
- Pharmacologic treament	78
* PATIENTS AND METHODS	80
* Discussion	119
* Summary And Conclusion	124
* Recommendations	126
* Refference	127-154
* ARABIC SUMMARY
