| <b><u>Subject</u></b>                                              | <b><u>Page</u></b> |
|--------------------------------------------------------------------|--------------------|
| Introduction .....                                                 | (1-4)              |
| Anatomy .....                                                      | (5-14)             |
| Biomechanics .....                                                 | (15-27)            |
| Trochanteric fractures of the Femur (Diagnosis & Management) ..... | (28-54)            |
| Material .....                                                     | (55-72)            |
| Methods .....                                                      | (73-100)           |
| Complications .....                                                | (101-107)          |
| Results .....                                                      | (108-117)          |
| Case presentation .....                                            | (118-133)          |
| Discussion & conclusion .....                                      | (134-149)          |
| Summary .....                                                      | ( 150 )            |
| References .....                                                   | ( I )              |
