

Section (2): Related to the research Question 1 states what do nurses know about care of unconscious patients?

Table (2): Frequency distribution of total & subtotal knowledge scores of respondents

Knowledge level frequency	unsatisfactory (< 50%)		Satisfactory (50-65)		Good (65-75)		Excellent (> 75)	
	No	%	No	%	No	%	No	%
	1-diffeniation consciousness	5	0	44	0	0	0	0
2- management of respiratory system	53	0	0	0	0	0	0	0
3- management of cardio vascular system	53	0	0	0	0	0	0	0
4 management of skin	53	0	0	0	0	0	0	0
5- assessment of temperature	53	0	0	0	0	0	0	0
6- assessment of body fluids	53	0	0	0	0	0	0	0
7- assessment of malnutrition	53	0	0	0	0	0	0	0
8- management of urinary system	53	0	0	0	0	0	0	0
9-management of bowel elemination	53	0	0	0	0	0	0	0
10- management of muscneoskeletal system	53	0	0	0	0	0	0	0
11- assessment of hygiene	53	0	0	0	0	0	0	0
12- assessment of psychological care	53	0	0	0	0	0	0	0
total X ± SD	76.03±13.24		0		0		0	

This table shows that the majority of nurses unsatisfied level of total knowledge.

Section (2): Related to the research Question 2 states what is their levels of clinical performance in this respect?

Table (3): Frequency distribution of total & subtotal performance scores of respondents.

performance level frequency	unsatisfactory (< 50%)		Satisfactory (50-65)		Good (65-75)		Excellent (> 75)	
	No	%	No	%	No	%	No	%
1-Maintain air way	49		4					
2-Maintain body circulation a-Check vital					47		6	
b-Maintain peripheral circulation			53					
c- Maintain body temp			49		4			
3- Maintain skin integrity	49		4					
4-Attain fluid balance a- fluid volume deficit	52		1					
b-fluid volume excess	53							
5-Prevent urinary infection and retention	52		1					
6-Keep adequate nutrition	47		6					
7-maintain bowel elimination a-Constipation	53							
b-Diarrhea	53							
c-bowel incontinence	53							
8-Maintain corneal integrity	53							
9-	53
