Introduction	1
Significance and Aim of the study	4
Review of literature	
<i>*Physiology of normal labor</i>	
- Concept of normal labor	5
- Comparison of false and true labor	6
- Component of birth Process.....	7
- Fetal response to Labor.....	9
- Causes of on set of labor	10
- Stages of labor	15
<i>* Pain</i>	
- Concept and perception of pain	23
- Physiology of pain	24
- Pain in labor.....	27
- Assessment of labor pain	31
<i>* Non pharmacological methods of pain relief during labor ...</i>	34
- Breathing techniques during labor	37
- Maternal position during labor.....	42
- Touch and massage	51
- Thermal stimulation.....	54
- Music.....	57
<i>*Nurses role in natural pain relief during labor.....</i>	58
Subjects and Methods.....	65
Result	74
Discussions.....	107
Conclusion.....	117
Recommendations.....	118
Summary	119
References.....	122
Protocol of the study	
Appendices.....	
Arabic Summary
