

CONTENTS

Subject	Page No.
Contents	I
Appendix	Iii
Summery	V
 CHAPTER I (Introduction)	
1. Introduction	1
2. Occurance of Alhagi maurorum	2
3. Chemical structure of lignocellulose	3
3. 1. Lignin	3
3. 2. Hemicelluloses	4
3. 3. Extractives	5
3. 4. Cellulose	5
3. 4.1. Chemical Modification of Cellulose	6
3. 4.1.1. Esterification of cellulose	6
Organic Esters	6
a. Cellulose acetate	6
Inorganic esters	7
Cellulose phosphate	7
3. 4. 1. 2. Etherification of cellulose	7
a. Carboxymethyl cellulose	8
b. Hydroxy ethyl cellulose	8
c. Hydroxy propyl cellulose	9
d. Methyl cellulose	9
e. Cyanoethyl cellulose	9
f. Carbamoylethyl cellulose	9
3. 4. 1. 3. Cellulose graft copolymer	10
Methods of grafting	10
Physical methods	10
Chemical methods	10
Characterization of grafted cellulose	16
Confirmation of grafting	16
3. 4. 1. 4. Oxidized and Hydrolyzed celluloses	16
3. 4. 1. 4. 1. Oxidised cellulose	16
3. 4. 1. 4. 2. Hydrolyzed cellulose	16
4. Utilization of agricultural wastes in water treatment	17
4.1. Agricultural waste materials for heavy metal removal	17
4.2. Agricultural waste materials for dye removal	20
Aim of the Present Work	23

CHAPTER II(Experimental)

1. <i>Experimental</i>	24
1.1. Materials	24
1.2. Methods	24
1. 2. 1. Preparation of dissolving pulp	24
1. 2. 2. Bleaching of pulp	25
1. 2. 3. Grafting procedure	25
1.2.4. Preparation of amidoximated Alhagi residues	26
1. 2. 5. Adsorption studies	26
1. 3. Analysis	27
1. 3. 1. Determination of Nitrogen content	27
1. 3. 2. Determination of carboxyl content	27
1. 3. 3. Determination of solubility% of amidoximated poly (MAA/AN)- grafted Alhagi residues	28
1. 3. 4. FT-IR spectroscopy	28
1. 3. 5. Scanning electron microscopy (SEM)	29

CHAPTER III (Results and Discussion)

3. Results and Discussion	30
3.1. FT-IR spectroscopy	30
3.2. Surface morphology	32
3.3 Factors affecting grafting reaction	33
3.3.1 Effect of irradiation dose	33
3.3.2 Effect of comonomer concentration and composition	34
3.4. Factors affecting the adsorption of Zn(II) ions onto amidoximated Alhagi residues	35
3.4.1. Effect of cation type	35
3.4.2. Effect of pH	36
3.4.3. Effect of adsorbent dose	37
3.5. Effect of adsorbate solution	37
3.5.1. Adsorption isotherms	37
3.6. Effect of contact time	44
3.6.1. Adsorption Kinetics	44
3.6.2. Mechanism of removal	49
3.7. Thermodynamic Parameters	49
4. Conclusions	52
References	53
