INTRODUCTION	1
REVIEW OF LITERATURE	4
I- Effect of environment, locations and years on fiber properties:	5
1- Fiber length	5
2- Fiber fineness and maturity	8
3- Fiber strength and elongation...	11
4- Yarn strength	14
II- Relationship between fiber and yarn properties	17
MATERIALS AND METHODS	22
RESULTS:	29
Comparison of fiber and yarn properties of propaga- tion strains	29
I- Giza 67 variety	29
1- Fiber length:	30
(a) 2.5% S.L. (fiber-staple length)	30
(b) 12.5% S.L. (fiber mean length)...	33
(c) Fiber length uniformity	36
2- Micronaire reading	39
3- Fiber strength and elongation...	42
(a) Pressley index (zero-gauge)	42
(b) Fiber bundle strength ($\frac{1}{8}$ in.-gauge)...	45
(c) Fiber bundle elongation	48

	<u>Page</u>
4- Yarn strength	51
II- Giza 69 variety	55
1- Fiber length	55
(a) 2.5% S.L. (fiber-staple length)	55
(b) 12.5% S.L. (fiber mean length)...	56
(c) Fiber length uniformity	61
2- Micronaire reading	65
3- Fiber strength and elongation...	68
(a) Pressley index (zero-gauge)	68
(b) Fiber bundle strength ($\frac{1}{8}$ in.-gauge)...	71
(c) Fiber bundle elongation	74
4- Yarn strength	77
DISCUSSION:	81
A- Effect of propagation on variation of fiber and yarn properties	81
B- Effect of environmental conditions on fiber and yarn properties	90
C- Relationship between fiber and yarn properties	94
