1- INTRODUCTION	1
2- REVIEW OF LITERATURE	6
2-1. The nutritive value of dates	8
2-3 Date quality	12
2-4. Quality and marketing	14
2-5. Composition of dates	15
2-5-1. Moisture	16
2-5-2. Sugars	16
2-5-3. Proteins and amino acids	18
2-5-4. Fats and fatty acids	19
2-5-5. Crude fibers	20
2-5-6. Vitamins	21
2-5-7. Ash and minerals	21
2-5-8. Enzyme	22
2-5-9. Polyphenols	24
2-5-10. Acidity and organic acids	25
2-5-11. Flavour compounds	26
2-5-12. Pigments	26
2-6. Date pit (seeds)	27
2-7. Date processing	33
2-7-1. Drying and canning dates	33
2-7-2. Frozen dates	37
2-8. Dates as source of high fructose syrup	39
2-8-1. Effect of substrate concentration	42
2-8-2. Effect of pH	43

2-8-3.	Effect of temperature	45
2-8-4.	Effect of equilibrium contents	46
2-8-5.	Production of high fructose syrup	47
3.	MATERIALS AND METHODS	50
3-1.	Materials:	50
3-2.	Technological treatments	50
3-2-1.	Canning dates	50
3-2-3.	Frozen dates	52
3-2-4.	Production of date peel <u>syrup</u>	52
3-2-5.	Colouring of milk with natural date pigments	52
3-2-6.	High fructose syrup production from dates	53
3-3.	Methods	53
3-3-1.	Chemical analysis	53
3-3-2.	Determination of phenolic compounds	53
3-3-3.	Determination of phenolic browning	54
3-3-4.	Determination of minerals	54
3-3-5.	Determination of rehydration rates	54
3-3-6.	Determination of fibers	54
3-3-7.	Extraction and determination of natural pigments	55
3-3-8.	Determination of total carbohydrates and their drevatives	56
3-3-9.	Determination of total carbohydrates and their drivatives	56
3-3-10.	Determination of hemiceliulose	56
3-3-11.	Identification and determination of sugars	57
3-3-12.	Determination of amino acids	58
3-3-13.	Determination of fatty acids	59
3-3-14.	Determination fructose in the presence of glucose	60
3-3-15.	Sensory evaluation	64

4.	RESULTS AND DISCUSSION	64
4-1.	Chemical composition of Samani and Zaghloul date	64
4-2.	Chemical composition of date seeds	69
4-3.	Chemical and organoleptic evaluation of date peel syrops	75
4-4.	Date pigments	77
4-5.	Canning and drying dates	81
4-5-1.	Canning dates	81
4-5-2.	Dried dates	97
4-6.	Froozen dates	101
4-7.	High fructose syrup production from dates	109
4-7-1.	Effect of glucose to isomerase	109
4-7-2.	Effect of substrate concentration on glucosze isomerase activity	111
4-7-3.	Effect of temperature of activity and stability of glucose isomerase	117
4-7-4.	Effect of pH on activity and stability of immobilized glucose isomerase	120
4-7-5.	Effect of time on the reaction validity of the used enzyme glucose isomerase	124
5.	SUMMARY	127
6.	REFERENCES	131
7.	ARABIC SUMMARY
