

CONTENTS

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	4
2.1. Body weight	4
2.2. Weight gain	8
2.3. Rate of growth	12
2.4. Feed consumption and efficiency	16
2.5. Shank and keel lengths as growth parameters	22
2.6. Slaughtering losses and carcass quality ...	24
2.7. Water holding capacity	27
2.8. Serum blood constituents	28
2.9. Calcium absorption through the small intestine	41
3. MATERIALS AND METHODS	47
3.1. Management of experimental birds	48
3.2. Grouping birds and experimental design	49
3.3. Parameters estimated and collection of data	52
3.4. Statistical analysis	61
4. RESULTS AND DISCUSSION	63
<u>-First Experiment-</u>	
4.1. Traits of growth parameters	63
4.1.1. Body weight	63
4.1.2. Body weight gain	69
4.1.3. Rate of growth	75
4.1.4. Keel and shank lengths	81
4.2. Parameters of feed efficiency	91
4.2.1. Feed consumption	91
4.2.2. Feed efficiency	97
4.3. Carcass quality measurement	102
4.3.1. Killing, dressing and eviscerating losses	102
4.3.2. Absolute and proportional weight of carcass and giblets	106
4.4. Serum blood indicators related to protein and calcium metabolism	110
4.4.1. Serum calcium level	110
4.4.2. Serum inorganic phosphorus	113
4.4.3. Serum total protein	116
4.4.4. Serum albumen content	118
