INTRODUCTION	1
REVIEW OF LITERATURE	3
1. The importance of legumes inoculation	4
2. Factors affecting nodule formation	7
2.1. Nitrogen	7
2.2. soil pH	11
2.3. soil salinity	12
2.4. Seed coat difusates	13
2.5. Biotic factors	14
3. Response of legumes to nitrogen fertilization	15
3.1. Plant growth	15
3.2. Yielding ability	19
4. General concept of drip irrigation system and its effect on moisture distribution in the soil	25
5. Drip irrigation system and its relation to N-fertilization	27
6. Water requirement for <i>Phaseolus vulgaris</i> plant.	29
7. Soil moisture and its effect on plant growth, yield and pod quality of <i>Phaseolus vulgaris</i>	29
8. Chemical constituents of pods	32
8.1. Fibre content	32
8.2. Protein content	34
8.3. Carbohydrate content	36
8.4. Moisture content	38
MATERIALS AND METHODS	39
RESULTS AND DISCUSSION	53
I. Laboratory experiment	53
a. Number and dry weight of nodules	53
b. Dry weight of root, shoot and whole plant	55
c. Total N and NO ₃ -N content in leaf blades	58

	Page
II. Greenhouse experiment	58
a. Nodulation of the roots	59
b. Detection of antagonistic factors affecting <i>Rhizobium</i> bacteria in soil.	59
III. Field experiments	61
A) Nitrogen application under submersion irrigation	61
1. Plant growth	61
1.1. Morphological characteristics	61
1.1.1. Plant height	61
1.1.2. Number of leaves	63
1.1.3. Leaf area index	65
1.2. Plant dry weight	68
2. Yielding ability	71
2.1. Extra pods category	71
2.2. Fine pods category	73
2.3. Bobby pods category	75
3. Physical and chemical characteristics of pods	78
3.1. Physical characteristics of pods	78
3.1.1. Pod length	78
3.1.2. Pod diameter	82
3.1.3. Pod dry weight	86
3.2. Chemical characteristics of pods	90
3.2.1. Fibers content	90
3.2.2. Protein content	96
B) Nitrogen application through drip irrigation	101
1. Plant growth	102
2. Yielding ability	105
3. Physical and chemical characteristics of pods	108
3.1. Physical characteristics of pods	108
3.1.1. Pod length	108
3.1.2. Pod diameter	109
3.1.3. Pod dry weight	111

	Page
3.2. Chemical characteristics of pods	112
3.2.1. Fibers content	112
3.2.2. Protein content	112
3.2.3. Chlorophyll content	114
3.2.4. Carbohydrate content	115
4. Nutrient content of <i>Phaseolus vulgaris</i> plant	116
