I. INTRODUCTION	1
II. REVIEW OF LITERATURE	4
1. Classification of non steriodal anti-inflammatory drug (NSAIDS)	4
1.1. Salicylates and their derivatives	5
1.2. Phenylbutazone and related drugs	5
1.3. Indomethacin and related drugs	5
1.4. Phenylacetic and related drugs	5
1.5. Mefenamic and related drugs	5
1.6. Oxicam and related durgs	5
1.7. Propionic acid derivatives	5
2. Piroxicam	6
2.1. Chemistry of piroxicam	6
2.2. Absorption, half-life and metabolism of piroxicam	8
2.3. Therapeutic dose of piroxicam	9
2.4. Toxicity and side effects of piroxicam	9
3. Pirprofen	12
3.1. Chemistry of pirprofen	12
3.2. Absorption, half-life and metabolism of pirprofen	12
3.3. Therapeutic dose of pirprofen	13
3.4. Toxicity and side effects of pirprofen	13
4. Anabolic steroidas	14
5. Biochemical estimations	17
5.1. Glucose	18
5.2. Serum bilirubin	20
5.3. Serum proteins	20

CONTENTS (Cont'd.)

	Page
5.4. Transaminase enzymes	22
5.5. Alkaline phosphatase	24
5.6. Serum creatinine	24
5.7. Serum urea	26
5.8. Prostaglandine	27
5.9. Triglycerides	29
5.10. Role of nucleic acids in protein synthesis	30
5.11. Lysosomes and anti-inflammatory drugs	30
6. Haematological and biochemical inter- relationships	31
 III. MATERIALS AND METHODS	
1. Materials	33
1.1. Antiinflammatory compounds	33
1.2. Steroidal anabolic compounds	34
2. Methods	35
2.1. Acute toxicity studies	35
2.2. Short term chronic toxicity studies ..	36
3. Experimental parameters	39
3.1. Serum biochemical analysis	39
3.2. Biochemical analysis in the liver	45
3.3. Blood hematological parameters	48
4. Statistical analysis	49
 IV. RESULTS AND DISCUSSION	
1. Acute toxicity studies	50
2. Short term chronic toxicity studies.....	53

CONTENTS (Cont'd.)

	Page
2.1. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on mortalities of rats	53
2.2. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on the body weight of rats....	57
2.3. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on the internal organs weight of rats	62
3. Serum biochemical studies	62
3.1. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on glucose and bilirubin level of rates.....	62
3.2. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on serum proteins level of rates.....	67
3.3. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on serum enzymes (GOT-GPT and ALP) of rats	69
3.4. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on serum non protein level of rats	73

CONTENTS (Cont'd.)

	Page
3.5. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on prostaglandin serum level of rats	76
4. Liver biochemical studies	78
4.1. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on serum and liver triglycerides of rats	78
4.2. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on liver nucleic acid (RNA-DNA) and total proteins of rats	80
4.3. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on total and released liver lysosomal enzymes of rats.....	83
5. Blood haematological studies	85
5.1. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on the blood picture of rats..	85
5.2. The effect of piroxicam and pirprofen with or without methyl androstenolone acetate on leucocytic counts of rats..	88
V. SUMMARY	94
VI. REFERENCES	99
VII. ARABIC SUMMARY.
