INTRODUCTION	1
1. REVIEW OF LITERATURE	3
1.1. Chemical composition of rapeseed varieties	3
1.1.1. Mineral content of rapeseed varieties	3
1.1.2. Amino acid composition of rapeseed varieties	4
1.1.3. Glucosinolate contents and its derivatives of rapeseed varieties	7-
1.2. Physicochemical properties of some edible oil	13
1.2.1. Fatty acid composition of some edible oils	14
1.2.2. Unsaponifiable matter of some edible oils	17
1.3. Oil blend and stability	22
2. MATERIALS AND METHODS	28
Materials	28
Methods	30
2.1. Extraction of rapeseed crude oil	30
2.2. Analysis of rapeseed content	30
2.2.1. Determination of total amino acid compositions	31
2.2.2. Determination of glucosinolate derivatives	31
2.2.3. Physicochemical properties of oils	32
2.3. Oils blending	33
2.3.1. Oxidative stability of oils using Rancimat method	33

2.3.2. Determination of fatty acids	33
2.3.3. Determination of unsaponifiable matters by GLC	34
2.3.3.1. Thin-Layer chromatography	34
2.3.3.2. Gas liquid chromatography	35
3. RESULTS AND DISCUSSION	37
3.1. Chemical composition of rapeseed varieties	37
3.1.1. Minerals constituent of rapeseed varieties	39
3.1.2. Amino acid composition of rapeseed varieties	39
3.1.3. Total glucosinolates and its individual components of rapeseed varieties	43
3.1.3.1. Total glucosinolates of rapeseed varieties	43
3.1.3.2. Individual components of glucosinolate of rapeseed varieties	45
3.1.4. Physicochemical properties of rapeseed oil varieties	53
3.1.5. Fatty acids composition of rapeseed oil varieties	56
3.1.6. Fractionation and identification of unsaponifiable matter components of rapeseed oil varieties	60
3.2. Oil blends	64
3.2.1. Physicochemical properties of some edible oils and blends .	64
3.2.2. The stability of some edible oils and blends	72
3.2.3. Fatty acid compositions of some edible oils and blends	77
3.2.4. The unsaponifiable matter of some edible oils and blends ...	86
