|--|------|
| 1. INTRODUCTION.....                           | 1    |
| 2. REVIEW OF LITERATURE.....                   | 3    |
| 2.1. Effect of soil moisture stress.....       | 3    |
| 2.1.1. Soybean growth.....                     | 4    |
| 2.1.2. Yield and its component.....            | 6    |
| 2.1.3. Effect on water use.....                | 10   |
| 2.1.4. Chemical composition.....               | 14   |
| 2.2. Effect of growth regulators.....          | 15   |
| 2.2.1. Effect on growth.....                   | 15   |
| 2.2.2. Effect on yield and its component.....  | 18   |
| 2.2.3. Water use.....                          | 19   |
| 2.2.4. Effect on chemical composition.....     | 23   |
| 3. MATERIALS AND METHODS.....                  | 25   |
| 3.1. Growth Regulators.....                    | 25   |
| 3.1.1. GA <sub>3</sub> .....                   | 25   |
| 3.1.2. Alar.....                               | 25   |
| 3.2. Soils.....                                | 25   |
| 3.3. Soybean variety.....                      | 26   |
| 3.4. Experimental treatments.....              | 26   |
| I. Soil moisture levels.....                   | 26   |
| II. Growth regulators.....                     | 26   |
| III. Concentrations.....                       | 26   |
| 3.5. Cultural practices.....                   | 27   |
| 3.6. Sampling.....                             | 27   |
| 3.7. Water relations.....                      | 28   |
| 3.7.1. Soil moisture content.....              | 28   |
| 3.7.2. Water consumptive use.....              | 32   |
| 3.7.3. Crop coefficient (K <sub>c</sub> )..... | 32   |
| 3.7.4. Water use efficiency.....               | 33   |
| 3.8. Chemical analysis.....                    | 33   |
| 3.8.1. Total nitrogen.....                     | 33   |
| 3.8.2. Total phosphorus.....                   | 35   |

|  | Page |
|--|------|
| 3.8.3. Total potassium.....                    | 35   |
| 3.8.4. Micro-Nutrients.....                    | 35   |
| 3.8.5. Protein Fractions.....                  | 35   |
| 3.8.6. Oil Content.....                        | 36   |
| 3.9. Statistical Analysis.....                 | 36   |
| 4. RESULTS AND DISCUSSION.....                 | 37   |
| 4.1. Growth behaviour.....                     | 37   |
| 4.1.1. Stem length.....                        | 37   |
| 4.1.2. Leaf area/plant.....                    | 42   |
| 4.1.3. Dry matter accumulation.....            | 48   |
| 4.1.3.1. Dry matter of roots.....              | 48   |
| 4.1.3.2. Stem dry matter.....                  | 51   |
| 4.1.3.3. Leaf petiol and blade dry matter..... | 54   |
| 4.1.3.4. Pod dry matter.....                   | 57   |
| 4.1.3.5. Whole plant dry matter.....           | 59   |
| 4.1.3.6. Dry matter distribution.....          | 63   |
| 4.2. Soybean yield.....                        | 56   |
| 4.2.1. Yield component.....                    | 66   |
| 4.2.1.1. Number of branches/plant.....         | 68   |
| 4.2.1.2. Number of pods/plant.....             | 69   |
| 4.2.1.3. Weight of seeds/plant.....            | 70   |
| 4.2.1.4. Seed index.....                       | 71   |
| 4.2.2. Seed yield.....                         | 72   |
| 4.2.3. Straw yield.....                        | 76   |
| 4.2.4. Harvest index.....                      | 77   |
| 4.2.5. Oil yield.....                          | 77   |
| 4.2.5.1. Oil content.....                      | 77   |
| 4.2.5.2. Oil production.....                   | 80   |
| 4.3. Evapotranspiration.....                   | 81   |
| 4.3.1. Seasonal values.....                    | 81   |
| 4.3.2. Daily rates.....                        | 87   |
| 4.3.3. Crop coefficient ( $K_c$ ).....         | 94   |
| 4.4. Water use efficiency.....                 | 96   |
| 4.4.1. Dry matter production.....              | 97   |
| 4.4.2. Marketable yield.....                   | 101  |

|  | <b>Page</b> |
|--|-------------|
| 4.5. Water and soybean yield relationship.....                         | 104         |
| 4.5.1. Actual evapotranspiration and soybean yield.....                | 105         |
| 4.5.2. Soil moisture level and yield.....                              | 106         |
| 4.5.3. Actual evapotranspiration soil moisture level<br>and yield..... | 107         |
| 4.6. Chemical Composition.....   | 108         |
| 4.6.1. Soybean protein.....  | 108         |
| 4.6.2. Nitrogen, phosphorus and potassium content.....                 | 111         |
| 4.6.3. Fe Mn and Zn content.....                                       | 121         |
| 5. CONCLUSION .....  | 134         |
| 6. SUMMARY.....  | 136         |
| 7. LITERATURE CITED.....   | 143         |
| 8. ARABIC SUMMARY.....   |             |
