	Page
1- INTRODUCTION.....	1
2- REVIEW OF LITERATURE.....	3
2.1. Classification of polysaccharides.....	4
2.2. Leguminous seed polysaccharides.....	6
2.3. Mannan and galactomannan polysaccharides.....	13
2.4. General methods of chemical characterization of polysaccharides.....	18
2.4.1.- Isolation and purification.....	18
2.4.2. Acid hydrolysis and identification of poly- saccharides constituents.....	23
2.4.3. Methylation analysis.....	25
2.4.4. Periodate oxidation.....	27
2.4.5. Infrared for carbohydrates.....	31
2.4.6. Molecular weight.....	32
2.5. Technological and gelling properties.....	34
3- MATERIALS AND METHODS.....	39
3.1. Isolation of the guar polysaccharide.....	40
3.2. Purification of the guar polysaccharide.....	41
3.3. Chemical analysis of guar polysaccharide.....	42
3.4. Hydrolysis of the polysaccharide, identification and qualitative and quantitative determination of the hydrolyzate.....	44
3.5. Periodate oxidation of guar polysaccharide.....	45
3.6. Determination of the molecular weight.....	46

	Page
3.7. I.R. Spectrum.....	46
3.8. Gelling and technological properties of guar gum....	47
4- RESULTS AND DISCUSSION.....	48
4.1. Analysis of guar seed.....	48
4.2. The yield of guar gum.....	48
4.3. Preliminary tests and properties of the guar gum....	51
4.4. Determination of molecular weight.....	53
4.5. Acid hydrolysis and identification of the hydroly- zate.....	56
4.6. IR spectrum of guar polysaccharide.....	57
4.7. Periodate oxidation.....	60
4.8. Technological and gelling properties of guar gum....	66
SUMMARY.....	67
REFERENCES.....	69
