1. INTRODUCTION -----	1
2. REVIEW OF LITERATURE -----	2
2.1. physiographic features of the studied area -----	2
2.1.1 - Location -----	2
2.1.2. Climate-----	2
2.1.2.1. Temperature-----	2
2.1.2.2. Rainfall-----	4
2.1.2.3. Evaporation -----	4
2.1.2.4. Relative humidity -----	5
2.1.2.5. Wind speed-----	5
2.1.2.6. Soil temperature and moisture regimes-----	5
2.1.3. Geology -----	6
2.1.4. Geomorphology-----	7
2.1.4.1. Geomorphology of Sinai Peninsula-----	7
2.1.4.2. Geomorphology of the studied area -----	13
2.1.4.2.1. Mountains and escarpment-----	13
2.1.4.2.2. Present channels-----	14
2.1.4.2.3. Terraces-----	14
2.1.4.2.4. Deltaic plain and coastal formations -----	14
2.1.4.2.4.1. Oolitic sand dunes-----	15
2.1.4.2.4.2. Sabkhas-----	15
2.1.4.2.4.3. playa-----	15
2.1.4.2.5. Outwash plains-----	16
2.2. Water supply-----	16
2.3. Natural vegetation and land use-----	17
2.3.1. Main channel and Tributaries-----	17
2.3.2. Affluents and runnels-----	18
2.3.3. Bir Sudr vicinity-----	18
2.3.4. Delta, sabkha, and sand dunes-----	18
2.4. Previous studies on the soils-----	19
2.4.1. Physical and chemical properties-----	19
2.4.1.1. Soils of the alluvial terraces-----	19
2.4.1.2. Soils of the present channels-----	20
2.4.1.3. Soils of deltaic plain-----	20
2.4.1.4. Soils of oolitic sand dunes-----	21
2.4.1.5. Soils of sabkha-----	21
2.4.1.6. Soils of outwash plain-----	22
2.4.1.7. Soils of playa-----	22
2.4.2. Statistical analysis of particle size distribution-----	23
2.4.3. Soil classification-----	23
2.4.4. Land suitability classification-----	26

CONTENTS (Cont.)

	Page
3. MATERIALS AND METHODS -----	27
3.1. Interpretation of satellite imagery -----	27
3.2. Field work-----	27
3.3. Laboratory analyses -----	28
3.4. Soil classification-----	30
3.5. Land evaluation-----	30
4. RESULTS AND DISCUSSIONS -----	31
4.1. Physiographic units of the studied area-----	31
4.1.1. Mountains, hills, and escarpments-----	33
4.1.2. Alluvial terraces-----	33
4.1.2.1. Old alluvial terraces-----	34
4.1.2.2. Young alluvial terraces-----	34
4.1.3. Alluvial deltaic plain -----	35
4.1.3.1. Upper alluvial deltaic plain-----	35
4.1.3.2. Lower alluvial deltaic plain-----	36
4.1.4. Playa-----	36
4.1.5. Sabkhas-----	36
4.1.6. Oolitic sand dunes-----	37
4.1.7. Coastal sand beach -----	37
4.2. Soil characteristics-----	37
4.2.1. Soils of the alluvial terraces-----	37
4.2.1.1. Old alluvial terraces-----	38
4.2.1.2. Young alluvial terraces -----	44
4.2.2. Soils of alluvial deltaic plain-----	50
4.2.2.1. Upper alluvial deltic plain-----	50
4.2.2.2. Lower alluvial deltaic plain-----	59
4.2.3. Soils of playa -----	68
4.2.4. Soils of sabkhas-----	72
4.2.5. Soils of oolitic sand dunes -----	75
4.2.6. Soils of coastal sand beach-----	79
4.3. Grain size analysis-----	83
4.4. Soil formation-----	102
4.4.1. Soil forming factors -----	102
4.4.2. Soil forming processes-----	103
4.4.2.1. Salinization and salic horizon-----	103
4.4.2.2. Gypsification and gypsic horizon-----	104
4.4.2.3. Calcic horizon-----	105
4.4.2.4. Organic matter status-----	106
4.5. Soil classification -----	107
4.5.1. Aridisols order-----	107
4.5.1.1. Salids suborder-----	107
4.5.1.2. Gypsid suborder -----	108
