1. INTRODUCTION	1
2. REVIEW OF LITURATURE	5
2.1. Methods and supports of immobilization of enzymes	7
2.1.1. Alpha-amylase enzyme and enzymatic hydrolysis of starch	7
2.1.2. Immobilization of amyloglucosidase enzyme and enzymatic saccharification	22
3. MATERIALS AND METHODS	33
3.1. Materials	33
3.1.1. Source of enzymes	33
3.1.1.1. Alpha-amylase enzyme	33
3.1.1.2. Glucoamylase enzyme (Amyloglucosidase AMG)	33
3.1.2. Supports for the immobilization techniques	33
3.1.3. Chemical reagents	33
3.2. Experimental methods	34
3.2.1. Enzyme assays	34
3.2.1.1. Alpha-amylase enzyme	34
3.2.1.2. Amyloglucosidase (glucoamylase) enzyme	35
3.2.1.3. Determination of D-glucose (reducing sugars)	35
3.3. Immobilization methods for α -amylase and amyloglucosidase enzymes	35
3.3.1. Entrapment with calcium alginate gels	35
3.3.2. Immobilization of enzymes on sand	36
3.3.3. Immobilization of enzymes on chitin	37
3.3.4. Adsorption of enzymes on concanavalin A-sepharose	38
3.3.5. Immobilization of enzymes on cyanogens bromide activated sepharose (CNBr-sepharose)	38
3.4. Evaluation of free and immobilized enzymes	39
3.4.1. Effect of pH on the enzyme activity	39
3.4.1.1. Alpha-amylase enzyme	39
3.4.1.2. Glucoamylase enzyme (Amyloglucosidase AMG)	40
3.4.2. Effect of temperature on the enzyme activity	40
3.4.2.1. Alpha-amylase enzyme	40
3.4.2.2. Glucoamylase enzyme (Amyloglucosidase AMG)	40
3.4.3. Effect of enzyme concentration on reaction activity	41
3.4.3.1. Alpha-amylase enzyme	41
3.4.3.2. Glucoamylase enzyme (Amyloglucosidase AMG)	41

	Page
3.4.4. Effect of substrate concentration on reaction velocity	41
3.4.4.1. Alpha-amylase enzyme	41
3.4.4.2. Glucoamylase enzyme (Amyloglucosidase AMG)	42
3.5. Stability of immobilized enzymes	42
3.6. Reusability of immobilized enzymes	43
3.7. Effect of incubation periods on the enzymatic hydrolysis of starch by using free and immobilized enzymes	46
4. RESULTS AND DISCUSSION	45
4.1. Effect of Na-alginate concentration on preparations of immobilized α -amylase and amyloglucosidase enzymes	47
4.1.1. Immobilization of α -amylase enzyme by entrapped within Ca-alginate gel beads	47
4.1.2. Immobilized amyloglucosidase enzyme within Ca- alginate beads	49
4.2. Effect of different supports on the retention activities of immobilized alpha-amylase and amyloglucosidase enzymes	50
4.2.1. Immobilization of alpha-amylase on different supports	50
4.2.2. Immobilization of amyloglucosidase enzyme	53
4.3. Evaluation of immobilized enzymes	55
4.3.1. Effect of pH on the reaction activity of free and immobilized enzymes	55
4.3.2. Effect of temperature on reaction activity of free and immobilized forms	59
4.3.3. Effect of enzyme concentration on reaction activity of free enzyme	61
4.3.4. Effect of substrate concentration on the reaction velocity of free and immobilized forms	64
4.4. Stability of enzymes after immobilization	72
4.5. Reusability of immobilized enzymes	78
4.6. Effect of incubation periods on the enzymatic hydrolysis of starch with free and immobilized enzymes	83
5. SUMMARY AND CONCLUSION	89
6. REFERENCES	93
7. ARABIC SUMMARY	93
