

CONTENTS

	Page
Introduction	1
Aim of the Work	4
Review of Literature.....	
• Gene.....	1
- Structure of the cell nucleus.....	1
- Nucleic acid composition, structure and function	1
- The nucleic acid composition	2
- The chromosomal structure	5
- Gene structure	8
- Gene regulation.....	12
- Genetic code.....	13
- DNA replication.....	13
- The protein synthesis	16
- Transcription.....	17
- The translation	19
- RNA-directed DNA synthesis	20
- Mutations of the gene	21
- Types of mutations.....	22
- Genetic engineering	24
- Principles of DNA recombinant technology	25
- Molecular cloning.....	32
• The gene therapy	35
- Gene delivery systems	39
1- Chemical methods.....	39
2- Physical methods	41

3- Biological methods	42
1- Retroviral vectors.....	47
2- Lentivirus vectors	52
3- Adenovirus vectors	55
4- Adeno-associated viruses.....	57
5- Herpes simplex virus	59
- Vector Choice	62
• INDICATIONS OF GENE THERAPY:	
1 - Gene therapy for hematological disorders.....	64
- Gene transfer into human hematopoietic stem cells..	65
- Gene marking.....	66
- Gene therapy for the hemoglobinopathies.....	68
- Gene therapy for hemophilias.....	73
2 - Gene therapy of X-linked form of sever combined Immunodeficiency.....	78
3 - Gene therapy of Adenosine deaminase deficiency.....	79
4 - Gene therapy Chronic Granulomatous Disease.....	80
5 - Gene therapy for HIV infection.....	82
6 - Human cancer and gene therapy.....	84
7- Gene therapy of pulmonary diseases.....	87
8- Gene therapy of CVS.....	95
• Risk of gene therapy.....	110
Summary	116
References	120
