ACKNOWLEDGMENT	I
AIM OF THE WORK	1
SUMMARY	3

INTRODUCTION

A. Sulfonamides	10
A.1. Background	10
A.2. Synthesis of Sulfonamides	11
A.2.1. Synthesis of Sulfonyl chloride Derivatives.....	12
A.3. Antibacterial Activity of Sulfonamides	17
A.3.1. Mechanism of antibacterial action.....	18
A.4. Applications of Sulfonamides	20
A.4.1. Anticancer Sulfonamides	22
A.4.2. Antihypertensive Sulfonamides.....	30
A.4.3. Antimalarial Sulfonamides.....	30
A.4.4. Antiviral Sulfonamides.....	31
A.4.5. Miscellaneous Applications.....	33
A.4.6. Sulfonamides as Biocides.....	34
A.5. Modification of Sulfonamides	36
A.5.1. Complexation	37
A.5.2. Amine Acid Saltation.....	41
A.5.2.1. Benefits of amine acid saltation.....	45
A.5.2.2. Using bioactive molecules in amine acid saltation.....	47
B. Surface Active Agents as Surface Active Agents	50
B.1. Background	50

B.2. General Structural Features and Behavior of Surfactants	51
B.2.1. Micelles formation and cmc	54
B.3. Classification of Surfactants	56
B.3.1. Anionic Surfactants.....	57
B.3.2. Cationic Surfactants.....	62
B.3.3. Nonionic Surfactant.....	63
B.3.4. Zwitterionic Surfactants	67

RESULTS & DISCUSSION

A. Characterization of the Synthesized Compounds	71
A.1. Synthesis of Biphenyl-4,4'-disulfonylchloride (1)	74
A.2. Synthesis of Biphenyl-4,4'-disulfonamides (Series A, A₁₋₄)	75
A.3. Synthesis of Amine Acid Salts of Bis (2-aminophenyl) biphenyl-4,4'-disulfonamide (Series B, B₁₋₆)	82
A.4. Synthesis of Metal Complexes of (2-aminophenyl) biphenyl-4,4'-disulfonamide (Series C, C₁₋₂)	91
A.4.3. The UV-visible spectral data.....	96
B. Surface Properties of Synthesized Compounds	99
B.1. Surface Tension (γ) and Critical Micelle Concentration (cmc)	99
B.2. Adsorption Studies ($\Gamma_{\max}$, $A_{\min}$)	105
C. Antimicrobial Activity of Synthesized Compounds	107
C.1. Antibacterial Activity	109
C.2. Antifungal Activity	112
C.3. Biological Activity Correlation with Surface Properties	115
D. Anticancer Activity of Synthesized Compounds	117
D.1. Activity against Colon Cancer	118
D.2. Activity against Liver Cancer	120

D.3. Activity against Breast Cancer.....	121
D.4. Anticancer Activity Correlation with Surface Properties.....	125

MATERIALS & METHODS

A. Characterization of Target Compounds.....	127
B. Measurements of Surface Active Properties.....	129
C. Antimicrobial Activity.....	130
D. Antitumor Activity.....	131

EXPERIMENTAL

Synthesis of Target Compounds.....	133
1) Synthesis of biphenyl-4,4'-disulfonyl chloride (1)	133
2) Synthesis of Series A, (Compounds A ₁₋₄)	134
3) Synthesis of Series B, (Compounds B ₁₋₆)	138
4) Synthesis of Series C, (Compounds C ₁₋₂)	143
