

TABLE OF CONTENTES

1. GEODETIC NETWORKS	1
1.1 The Objective of the Thesis	1
1.2 Scope of Presentation	1
1.3 Geodetic Networks	4
1.4 Conventional Geodetic Control Networks	5
1.4.1 One- Dimensional Conventional Geodetic Networks	5
1.4.2 Two- Dimensional Conventional Geodetic Networks	5
1.4.3 Three Dimensional Conventional Geodetic Networks	6
1.5 Techniques for Establishing Conventional Geodetic Networks	8
1.5.1 Triangulation Network	8
1.5.2 Trilateration Network	10
1.5.3 Hybrid Network	11
1.6 Satellite Geodetic Control Networks	12
2. GEODETIC DATUMS AND TRANSFORMATION MODELS	13
2.1 Geodetic Datums	13
2.1.1 Definition of the Geodetic Datum	13
2.1.2 History of Geodetic Datums	14
2.1.3 The Conventional Geodetic Datums	17
2.1.4 The Satellites Geodetic Datums	18
2.1.4.1 The World Geodetic System 72, (WGS72)	19

2.1.4.2 The World Geodetic System 84, (WGS84)	20
2.1.4.3 The International Terrestrial Reference Frame (ITRF)	21
2.2 Transformation Models	23
2.2.1 Transformation Strategy	24
2.2.2 Transformation Parameters	26
2.2.3 Transformation Models Formulae	30
2.2.3.1 One-Dimensional Transformation Models	30
2.2.3.2 Two-Dimensional Transformation Models	30
2.2.3.2.1 Similarity Transformation in Two-Dimensions	31
2.2.3.2.2 Polynomial Transformation in Two-Dimensions	35
2.2.3.3 Three-Dimensional Transformation Models	38
2.2.3.3.1 Datum Shift (Geocentric Translations)	38
2.2.3.3.2 Similarity Transformation in Three-Dimensions	39
2.2.4 Three-Dimensional Conversions Formulae	46
2.2.4.1 Geodetic / Geocentric Conversions	46
2.2.4.2 Geodetic/ Map Coordinates Conversions	47
3. DATA UNDER CONSIDERATION	50
3.1 The Coordinate Sets Based on the Old Egyptian Datum, (OED)	50
3.1.1 The Egyptian Geodetic Control Network (1)	51
3.1.2 The Egyptian Geodetic Control Network (2)	55
3.1.3 The Available OED Data Sets	60
3.1.3.1 OED-Data Set (1)	60
3.1.3.2 OED-Data Set (2)	60
3.1.3.3 OED-Data Set (3)	60

3.2 The Coordinate Sets Based On the World Geodetic	
System 1972, (WGS72)	62
3.2.1 WGS72-Data Set (1)	62
3.2.2 WGS72-Data Set (2)	65
3.3 The Coordinate Sets Based On the World Geodetic	
System 1984, (WGS84)	67
3.3.1 WGS84-Data Set (1)	68
3.3.2 WGS84-Data Set (2)	74
3.3.3 WGS84-Data Set (3)	77
3.3.4 WGS84-Data Set (4)	80
3.3.5 WGS84-Data Set (5)	84
3.3.6 WGS84-Data Set (6)	89
3.3.7 WGS84-Data Set (7)	92
3.3.8 WGS84-Data Set (8)	96
3.3.9 WGS84-Data Set (9)	99
3.3.10 WGS84-Data Set (10)	102
3.3.11 WGS84 -Data Set (11)	103
3.3.12 WGS84-Data Set (12)	108
4. TRANSFORMATION PACKAGE DESIGN AND DESCRIPTION	114
4.1 Geodetic Datum Calculator	114
4.2 Interface Screen	116
4.3 The Main Program Screen	116
4.4 2D-Transformation	117
4.4.1 Similarity Transformation	118

4.4.2 Polynomial Method	120
4.5 3D-Transformation	123
4.5.1 Datum Shift	124
4.5.2 (3-D) Processes	126
4.6 Map Projection	133
4.6.1 Convert Lat, Long to Map Coordinates	134
4.6.2 Convert Map Coordinate to Lat, Long	135
5. COMPUTATIONAL WORK RESULTS AND ANALYSIS	137
5.1 Step (1): Determining the Common Points among the Available Data Sets	138
5.1.1 Common Points among WGS84 Data Sets	138
5.1.2 Common Points among WGS72 and WGS84 Data Sets	142
5.1.3 Common Points among OED Data and WGS84 Data	143
5.2 Step (2): Data Filtering	144
5.3 Step (3): Unifying the Different WGS84-Data sets and WGS72- Data Sets into One WGS84 System	148
5.3.1 Unifying the Data Sets Having Direct Link with WGS84-Data Set 1	148
5.3.2 Unifying the Data Sets Having Indirect Link with WGS84-Data Set1	154
5.3.3 Describing and Adding the Data Sets Having No Link with WGS84- Data Set1	155
5.4 Step (4): Computing Transformation Parameters between WGS84 and OED all over Egypt	156
5.4.1 Transformation Using 3-Shift Parameters	157
5.4.2 Transformation Using 7- Transformation Parameters	162
5.4.3 Comparing the Results of the Five Solutions	171
5.5 Step (5): Transforming all WGS84 Coordinates into OED	175

5.6 Step (6): Transforming all OED coordinates into WGS84	176
6. SUMMARY, CONCLUSIONS AND RECOMMENDATIONS	
6.1 Summary	177
6.2 Conclusions	178
6.3 Recommendations	183
REFERENCES	186
APPENDIX (A)	191
