LIST OF FIGURES	v
LIST OF TABLES	ix
LIST OF SYMBOLS	x
LIST OF ABBREVIATIONS	xii
ABSTRACT	xiii

Chapter 1

INTRODUCTION

1-1 General	1
1-2 Problem Definition	2
1-3 Main Objectives	6
1-4 Research plan	6
1-5 Thesis content	6

Chapter 2

LITERATURE REVIEW

2-1 Introduction	8
2-2 The River Nile	9
2-3 Historical Background of Human Interventions.	11
2-4 Types of Human Interventions on The River Nile.	13
2-5 River Regulation Works.	13
2.5.1 Spur Dikes	15
2.5.1.1 Definition and functions.	15
2.5.1.2 Spur types.	15
2.5.1.3 Design Parameters	18
2.5.2 Bendway Weirs (Stream Barbs)	19
2.5.2.1 Definition and functions.	19
2.5.2.2 Design concept.	19
2.5.2.3 Design guide lines.	21
2.5.3 Submerged Vanes	23
2.5.3.1 Definition and functions.	24
2.5.3.2 Design guide lines.	26
2.5.4 Bank Revetment.	27

2.5.4.1 Stone protection.	28
2.5.4.2 Design of Stone.	31
2.5.4.3 Filter design.	32
2-5-5 Dredging.	34
2.6 Sediment transport.	34
2.6.2 Factors Affecting Sediment Transport.	36
2.6.2.1 Bed Shear Stress.	36
2.6.2.2 Incipient velocity.	36
2-7 Mathematical Models	38
2-8 Models Formulation	41
2-8-1 “SMS” 2-D Model	42
2-8-1-1 Model Description	42
2-8-1-2 Governing Equations	42
2-8-1-3 Numerical Techniques and Limitation	43
	48

Chapter 3

SITE DESCRIPTION AND DATA COLLECTION

3-1 Introduction	50
3.3 Nile River Bed Levels.	51
3-4 Velocity Measurements	54
3-5 Bed Material samples	64
3-6 Hydrological Data	72

Chapter 4

MATHEMATICAL MODELS FORMULATION AND PREPARATION

4-1 Model Preparation	76
4-1-1 Data Assignment	77
4-1-1-1 Roughness Estimation	77
4-1-2 Network Design	77
4-1-3 Calibration Results	78
4-2 Sensitivity Analysis	83
4-3 Summary	84

Chapter 5

STUDY PROGRAM FOR MODELING

5-1 Introduction	92
5-2 mathematical model data Input	92
5-3 Mathematical model calibration	93
5-4 different cases of study	93
5-5 SMS model output.	94
5-6 Estimation of erosion zones	94

Chapter 6

Testing Results and Analysis

6-1 Morphological Changes occurred at the Study Area.	99
6-2 Effect of Different Flow Scenarios Passing Through the Study Area on Mean Velocity	105
6-3 Effect of Different Flow Scenarios Passing Through the Study Area on Bed Shear Stress.	109
6-4 Effect of Different Flow Scenarios on Bed Erosion	114
6-5 Effect of road construction on river Hydraulic Characteristics	117
6-6 Effect of Road Construction on Bed Shear Stress	122
6-7 Different alternatives to reduce negative effect.	127
6-8 Comparisons of Bed Shear Stress Between the Three Alternatives at Maximum Flow.	128
6-9 comparisons of bed shear stress between the three alternatives at flood flow	131
6-10 comparisons of mean velocity between the three alternatives at maximum flow.	137
6-11 comparisons of mean velocity between the three alternatives at flood flow	140
6-12 Effect of road length on erosion zones in the study reach.	146

Chapter 7

SUMMARY CONCOLISIONS AND RECOMMENDATIONS

7-1 Summary	154
7-2 Conclusions	154
7-3 Recommendations.	156
7-4 Future studies.	156
 REFERENCES.	 157
ARABIC SUMMARY
