

Contents	Page
Chapter I: Introduction	1
1.1. Clay minerals	4
1.1.1. Kaolinite	6
1.1.2. Montmorillonite	7
1.1.3. Illite	8
1.2. Clay bricks manufacturing process	9
1.2.1. Quarrying of raw materials	9
1.2.2. Preparation of the clay batch	10
1.2.3. Forming of the clay bricks	10
1.2.4. Drying	11
1.2.5. Firing	13
1.3. Literature Review	15
1.4. Aim of the Work	22
Chapter II: Experimental Part	23
2.1. Raw materials.....	23
2.2. Characterization of the raw clay.....	24
2.2.1. X-Ray diffraction analysis (XRD).....	25
2.2.2. Differential thermal analysis (DTA).....	27
2.2.3. Particle size analysis of the clay sample.....	28
2.2.4. The chemical composition (XRF).....	29
2.2.5. Water content and plasticity of the clay paste.....	30
2.2.6. Drying behavior of shaped raw clay brick samples (Bigot curve).....	31
2.3. Proportion of prepared clay batches with various additives.....	32

2.4. Effects of additives on the properties of the raw material and the properties of dry and fired products.....	34
2.4.1. Effect on the plasticity.....	34
2.4.2. Effect on the drying behavior (Bigot Curve).....	34
2.4.3. Effect of additives on properties of the fired samples.....	35
2.4.3.1. The total Linear Shrinkage.....	36
2.4.3.2. The loss on weight on firing.....	36
2.4.3.3. The water absorption	36
2.4.3.4. The apparent porosity.....	37
2.4.3.5. The bulk density.....	37
2.4.3.6. The crushing strength.....	38
Chapter III : Results and Discussion.....	39
3.1. Characterization of the raw clay.....	39
3.1.1. X-Ray diffraction analysis (XRD) of the raw clay.....	39
3.1.2. Differential thermal analysis (DTA).....	43
3.1.3. Particle size analysis of the clay sample.....	45
3.1.4. Chemical composition. (XRF) for clay sample.....	47
3.1.5. Water content and plasticity of the raw clay.....	49
3.1.6. The drying sensitivity (Bigot curve) of the raw clay	51
3.2. Characterization of the additives.....	53
3.2.1. X-ray diffraction for waste fired clay bricks (Grog).....	53
3.2.2. Sieve analysis of used additives.....	55
3.2.2.1. Sieve analysis of added sand	55
3.2.2.2. Sieve analysis of added saw dust	55
3.2.2.3. Sieve analysis of added ground waste fired bricks (grog).....	55
3.3. Effect of additives on the properties of the clay batch	56
3.3.1. Effect on plasticity.....	56
3.3.1.1. Effect of sand.....	56

3.3.1.2. Effect of saw dust on plasticity of clay batch	58
3.3.1.3. Effect of fine and coarse grog.....	59
3.3.2. Effect of additives on drying sensitivity (Bigot Curve) of the raw clay.....	66
3.3.2.1. Effect of the sand	66
3.3.2.2. Effect of the fine grog additives.....	68
3.3.2.3. Effect of the coarse grog additives	70
3.3.2.4. Effect of saw dust addition.....	72
3.4. Effect of additives on the physico mechanical properties of fired brick samples.....	74
3.4.1. The total linear shrinkage percent.....	74
3.4.1.1. Effect of sand.....	74
3.4.1.2. Effect of saw dust.....	75
3.4.1.3. Effect of fine and coarse waste fired bricks (Grog).....	77
3.4.2. The loss on weight on firing.....	81
3.4.2.1. Effect of sand.....	81
3.4.2.2. Effect of saw dust.....	82
3.4.2.3. Effect of fine and coarse waste fired bricks (Grog).....	84
3.4.3. The water absorption.....	88
3.4.3.1. Effect of sand.....	88
3.4.3.2. Effect of saw dust.....	89
3.4.3.3. Effect of fine and coarse waste fired bricks (Grog).....	91
3.4.4. The apparent Porosity.....	95
3.4.4.1. Effect of sand.....	95
3.4.4.2. Effect of saw dust.....	96
3.4.4.3. Effect of fine and coarse waste fired bricks (Grog).....	98
3.4.5. The bulk density.....	102
3.4.5.1. Effect of sand.....	102

3.4.5.2. Effect of saw dust.....	103
3.4.5.3. Effect of fine and coarse waste fired bricks (Grog).....	105
3.4.6. The crushing strength.....	110
3.4.6.1. Effect of sand.....	110
3.4.6.2. Effect of saw dust.....	111
3.4.6.3. Effect of fine and coarse waste fired bricks (Grog).....	113
4. Conclusion.....	118
5. English Summary.....	120
6. References.....	127
7. Arabic Summary
